

Welcome to EcoFi's Future of Decentralized Finance.

EcoFi's NFT's generated through Farming & Staking will revolutionize DEFI Solving your financial stability and ensuring long lasting secured assets.

A large circular graphic with a dark background and several diagonal, overlapping bands of dark green. The word "EcoFi" is centered in a white, stylized, sans-serif font.

EcoFi

Santa Monica, Oct 21, 2020 ([Issuewire.com](https://www.issuewire.com)) - Ecofi will be one of the few Defi protocols to withstand the upcoming bull run's volatility and flourish in the ensuing bear run. EcoFi's roadmap to the future will include yield farming, unique farmable NFT's, DAO Governance of EcoFi development, staking to ensure lasting value, constant Eco-Innovation, community curation of NFT's and other purchasable algorithmically backed assets.

We also propose a real-world Asset-to-NFT 'Market Asset Maker', which will be Oracle-Validated and securely mint residual profits for anyone holding the limited supply run of the MAM correlated to the Asset.

By sprouting ECO NFT's, this envisions and tokenizes an excellent future for both the ECO environment and the early crypto investor's dreams. Our forward-thinking Community and Developers will ensure we maximize value for all of our EcoFiers.
