Barefoot Botany is introducing the Mini Garden.

Turns any person into a gardener. We ship gorgeous native flowers that local bees and butterflies LOVE.

We use living soil with all the beneficial organisms that keep plants healthy, without the use of chemical pesticides or synthetic fertilizers.

We ship each Mini Garden in a real Terracotta pot from Italy.

Comes with Organic Soil, Seeds, Pot & Grow Light. Each of us working together, in a small patchwork of gardens can bring back nature to a healthy state.
