

DIGITAL NATIVE ASSET BACKED TOKENIZATION Coop

RealtyDAO launches first digital native asset-backed tokenization platform and coop with RDAO token.

Wilmington, Nov 10, 2020 ([IssueWire.com](https://www.issuewire.com)) - Digital Currency and Blockchain technology are creating exciting new opportunities while forcing ALL companies to analyze how they operate their business going forward. We are witnessing a revolutionary leap in technology and economics, not unlike the Industrial Revolution.

The assimilation of new methods of value exchange around digital assets, decentralization, and economics like cryptocurrency, represents a new revolution. Ahead of this curve is RealtyDAO and its newly launched programmable token, RDAO, a transparent and programmable alignment mechanism with premium Digital Native Assets on the blockchain.

“When we purchased DigitalCurrency.com back in 1999, it was hard to imagine what that future would look like,” shares eDad, a lead Contributor of RealtyDAO. “But now digital currency is creating and changing global markets at lightning speed. With RealtyDAOs digital native asset-backed currency, RDAO is going to revolutionize value creation, distribution, and automation for Digital Native Assets (DNA).

RealtyDAO manages 1,000's of URL's and TLD's, with a vision of facilitating autonomous running companies around these premium assets together with a blended community of digital creators and owners simultaneously owning these DAOs.

RealtyDao has built a tokenization platform around these digital assets such as TLDs from Handshake, domains, and crypto projects such as NFT's. It will allow domain owners and crypto enthusiasts to provide liquidity for the RDAO token while creating tokenized digital assets on the ethereum blockchain.

The proprietary list of digital assets managed by RDAO and its integrated VNOC platform is a game-changer and the market is getting wind of how and why RealtyDAO is unique and valuable.
