

Find personalized healthcare services at low cost with MDguru

Los Angeles, Nov 16, 2020 ([IssueWire.com](https://www.issuewire.com)) - MDguru is a leading name in healthcare information technology offering offers personalized healthcare plans and specialists based on your clinical background and demographics so that you get the best quality care at the least possible cost. [MDguru](#) offers a one-stop to compare the quality of providers and net out of pocket costs for [Medicare](#) and [Medicaid](#) consumers to make an informed decision to pick a plan or a specialist.

[MDguru](#) was founded on an idea to promote transparency in health care quality and pricing. [MDguru](#) believes transparency drives up the quality and drives down the cost. In an ideal case, patients would get the best quality at least possible cost, providers get paid based on quality rather than quantity, payers would benefit from the above two scenarios. MDguru is a platform to promote transparency and a result-driven healthcare model so that consumers can make well-informed decisions about health care.

At [MDguru](#), we understand healthcare is one of the top priorities for you and your family's well-being. Picking the right healthcare provider is pivotal when you are looking for care delivery. We'll help you with achieving that objective. MDguru strives to make healthcare transparent and help you with making an informed decision regarding a physician. MDguru makes it possible to check population health metrics such as how many procedures a surgeon has performed, what is avg. out of pocket cost and how their patient population is doing after the procedure.

Next time, when you are planning for a procedure like Total Knee Replacement, Hip Replacement, Heart Valve Procedures, Cancer treatment please check the outcomes of each physician in your area at MDguru and set up an appointment to get the right care at a key juncture of your life and enjoy the rest of your life without any complications. MDguru also offers utilization and outcome ratings for medications based on demographics and clinical history. Please review this information to discuss your medication options with your provider.

MDguru team has more than ten years of experience in healthcare information technology. Their team has the right experience and knowledge to envision how to utilize claims, EMR data, and skillset to implement that vision. The team developed the MDguru platform to promote transparency and a result-driven health care model so that consumers can make informed decisions about health care. Their innovative AI technology offers personalized healthcare plans and specialists based on clinical backgrounds and demographics so that one can get the best quality care at the least possible cost. Compare the quality of providers and net out of pocket costs to make an informed decision to pick a plan or a specialist.

MDguru integrates with your health records apps such as Apple Health or your claims records such as BlueButton so that with just a click or two you can select a personalized plan or specialist. Based on your medication history, MDguru offers options to save medication costs and learn more about personalized medication options.
