

Grab 3 Months Free Mobile Service Offer with Mint Mobile's Black Friday Sale

Los Angeles, Nov 26, 2020 ([Issuewire.com](https://www.issuewire.com)) - Wireless mobile company Mint Mobile announced their Black Friday Sale offering a slashing deal of three months of free mobile service against a purchase of the same three months plan. The offer is live till Friday, PST, and is proving a bonanza deal for all Mint Mobile customers.

Mint Mobile was built with the idea of delivering affordable, premium wireless direct-to-customer service. The customer can buy their prepaid sim card that uses T-mobile satellites. The coverage is uninterrupted and maximum and is at par with any other wireless service that a phone might be using. They also offer a 7-day free trial before a customer can go forward with the purchase of a service plan to their liking. As per the company's majority owner and actor Ryan Reynolds, "Mint is making wireless way more affordable at a time when the average American is paying 65 dollars a month."

The service offers affordable, unlimited wireless prices alongside a consistent and reliable network. Mint Mobile currently offers four prepaid data plans between 3 GB of data per month to an unlimited plan. Although customers have to pay a three-month service charge in advance for talk time, text, and data, the deal, on the whole, is economic. Their price for the 3 GB data plans is comparable to the cheapest service out there. However, in terms of network and service, Mint Mobile stands head and shoulders above its contemporaries.

Choose Mint Mobile for:

- The affordability and economic benefits of service plans
- Strong coverage
- Compatibility with all devices
- Cheapest unlimited data plan

The Black Friday Sale is live till Friday, PST. Grab your deal now! For more information, visit
