

Jay Sawyer of Chicago Discusses the Advantages & Disadvantages of Free College

This Press Release intends to inform the readers about the various advantages and disadvantages of free college.

Chicago, Nov 27, 2020 ([IssueWire.com](https://www.issuewire.com)) - **Jay Sawyer** of **Chicago** has always believed that free college can play a significant role in making the workforce of our country more agile. He emphasizes that the high cost of college and large amounts of student debt are affecting the financial future of college graduates negatively. He highlights that countries such as Norway, Finland, Sweden, Germany, France, and Denmark offer free education for the following reasons:

- Remedy to society's ills as our society is more divided by wealth than by any other criteria
- Greater advantage as even though scholarships are intended for the disadvantaged few, the disadvantaged aren't just few
- Focus on learning
- Improved quality of life

Jay Sawyer of **Chicago** completely understands that there is a negative side to it too which includes

- the problem of overcrowding in public institutions
- the risk of inequality arising. ...
- an obvious strain in the limited resources available

While he shares all this information, Jay Sawyer does not support the idea of the taxpayer paying for free education.

About Jay Sawyer

Jay Sawyer is a long-time philanthropist who is associated with several noble causes. He is an animals' rights activist, environmentalist, and an advocate for world peace too. A lover of nature and wildlife, Jay strives hard to inform and educate the masses about the causes that drive him. He is quite determined about making a long-lasting impact on society.

As far as his personal life is concerned, Jay is a skilled tennis and pickleball player. He takes great pride in introducing himself as the biggest Chicago bear fan who attended more than 10 games in the year 1972 and every single game in the year 1985.
