

Polygraph test in Los Angeles for \$145!

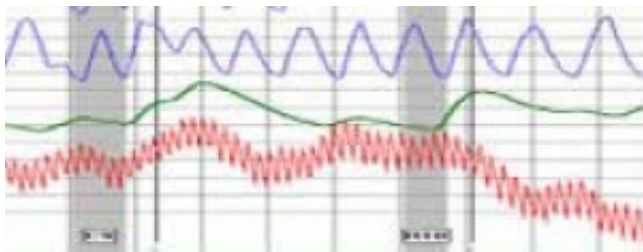

Los Angeles lie-detector tests for relationship/infidelity, theft, immigration, pre-employment and abuse, San Fernando Valley too

Los Angeles, Nov 6, 2020 ([Issuewire.com](http://www.Issuewire.com)) - Most Los Angeles polygraph examinations are for suspected infidelity-- or to see if the details of a tearful admission of cheating were actually complete. Most victims of infidelity never even suspect it: so by the time you actually feel it may have happened, often it did. At PUBLICpolygraph.com a complete computerized testing administered by renowned nationwide certified examiner is \$145. Fully confidential; no names are needed.

Following Federal polygraph guidelines, the client can write one to four Yes or No answerable questions to be used during the Los Angeles polygraph test. For accuracy, it helps for each question to be no more than 19 words long, and to have no 'ands' 'ors' or commas. Don't use 'soft words' like 'Did you sleep with . . . ' if you mean 'Did you have sex with . . . '. And in many cases, the client can be permitted to quietly monitor the testing, seeing and hearing everything-- including watching a big-screen monitor of the person's body changes as they occur-- blood, sweat and breathing.

John Grogan (CertifiedPolygraph.com) has been polygraph testing for nearly 35 years, has tested more than ten-thousand persons for all types of testing from relationship cheating through murder, and he is the overwhelming choice of TV studios with him having more televised/broadcast polygraph tests than ALL other polygraph examiners COMBINED, with his more than 1000 TV/media appearances and more than 300,000,000 views of his polygraph work on social media. The public can use John's extreme skills for \$145 (that is half the price of typical L.A. test quotes) by visiting PUBLICpolygraph.com or calling 818 883-6969. Know the truth today!
