

Resonea Inc Launches Sleep Apnea As A Service Product

Scottsdale, Nov 19, 2020 ([Issuewire.com](https://www.issuewire.com)) - Resonea Inc. is pleased to announce the launch of their Sleep Apnea As A Service™ product offering. Resonea's Sleep Apnea As A Service is a streamlined, cost-effective way to identify and help individuals who suffer from obstructive sleep apnea (OSA). The technology is a comprehensive program that identifies those at risk for OSA, connects them with a doctor for consultation, and moves them from screening to treatment in 5 working days or less on average.

Obstructive Sleep Apnea (OSA) affects almost 30 million people in the US, with up to 80% remaining undiagnosed. OSA is a significant contributor to lost productivity, workplace accidents, and the medical costs of various comorbid conditions such as congestive heart failure, hypertension, type II diabetes, and depression. Studies have shown that addressing employee sleep health can make a real impact on employee well-being and quality of life and an organization's bottom-line.

At the core of Sleep Apnea As A Service is DROWZLE® Pro. DROWZLE Pro is a fully digital FDA cleared home sleep test, which is delivered via smartphone. It is the only home sleep test using smartphone technology for suspected possible sleep breathing disorders, like obstructive sleep apnea. The utilization of mobile technology is fundamental to streamlining this normally arduous process by 1) enabling contactless interaction between physician and patient, 2) eliminating the logistical costs of shipping, retrieving, and disinfecting home sleep test equipment, and 3) putting the patient on a quicker path to treatment. In short, a physician can order the test, review results, offer consultation, and prescribe treatment, all without the need for in-office visits or the reliance on traditional home sleep testing equipment.

"Traditional sleep medicine has not been able to help many patients who need care. Patients are often lost to follow up as they try to navigate the complex multi-step process required to get diagnosed and treated. Sleep Apnea As A Service by Resonea takes the current fragmented, time-consuming, and inefficient process and provides a less expensive and more comprehensive solution. DROWZLE Pro provides both physicians and patients faster results, with a more proactive approach in moving through the process, thus keeping the patient educated, engaged, and informed throughout their journey." Karen Underwood, MD, MBA, Chief Medical Officer of Resonea.

Located in Scottsdale, AZ, and established in 2016, Resonea, Inc. is a Sleep Health technology company. Whose mission is to advance sleep health science to improve performance, safety, and quality-of-life. Resonea's comprehensive Sleep Health Program includes DROWZLE® PRO, the first-ever smartphone-based home sleep test cleared by the FDA, which transforms how obstructive sleep apnea is detected using only a mobile phone. Resonea's technology allows for widespread access to sleep health services while keeping patients safe in their own homes.
