

# SECURAM Launches Updated SECURAM Smart Home Security

The new SECURAM Touch and Smart Hub system boasts longer battery life and digital assistant capabilities, surpassing competitors and previous versions of the fingerprint sensor home security device

The High-Security Smart Lock is Here

## SECURAM TOUCH NEWLY UPDATED

**Los Angeles, Nov 17, 2020** ([Issuewire.com](http://Issuewire.com)) - SECURAM Systems, Inc., best known for their commercial security solutions, this week showcased their new SECURAM Touch high-security fingerprint smart deadbolt front door lock. Earlier this year, the brand launched the SECURAM Touch at CES 2020 and received the Innovation Award in the Smart Home Category. This new version of the device features high-tech integrations with bluetooth capabilities, as well as the Smart Hub, which connects with WiFi and allows users to control the device from their phones.

The SECURAM Touch allows you to easily unlock your home by using its proprietary touch-to-open technology. The first-of-its-kind, smart deadbolt integrates wireless technology with RF, which allows approved users to unlock the door with their fingerprint. The remote connectivity is protected through AES 128-bit encryption. SECURAM adds an additional layer of security via a unique one-time code encryption algorithm. The housing of the deadbolt is made of milled metal with a stainless steel bolt, preventing tampering.

The new Touch highlights:

- Double the battery life. Two CR123A batteries in an improved casing power the Touch for up to 1 year with average use (4-5 lock opens per day)
- Updated Bluetooth module, using SDK17, which creates a more robust signal for a stronger connection
- Includes a sleeker, thinner door magnet sensor, allowing for easier installation on a greater

variety of door frames for a more stylish look

- The new door magnet sensor fits snugly *between* the door and the jamb, as opposed to *on the outside* the jamb providing an even more secure lock
- Allows you to toggle the 15 second auto-lock feature on and off, offering a manual lock option

The updated Touch is part of SECURAM's comprehensive smart home security suite. From biometric smart locks, to perimeter security sensors for the side doors and windows, to even smart safe locks for precious valuables, the brand offers a security suite with multiple layers of home exterior and interior protection.

Earlier in 2020, Digital Trends named the SECURAM Touch the Best Smart Locks for 2020, durability winner: "The design is bulletproof. Any cat burglars looking to swipe this bad boy from your front door will be hard-pressed. The deadlock casing is wrapped in an impenetrable milled metal shell."

"SECURAM values security that just works," said CEO, Chunlei Zhou. "Beyond our innovations in biometrics to securely lock and unlock your home, you won't find bells and whistles that complicate the process of getting into the house. The bluetooth capabilities also add an additional layer of security, not storing data in unsecured locations. It also protects against vulnerabilities associated with voice recognition hacks that competitors have faced."

Jeremy Brookes, Director of Sales, said: "We know batteries running out every few months is a sore spot among many smart lock customers, especially with integrated wifi. We wanted the battery life on the Touch to be long lasting and as durable as the metal exterior and really stand the test of time."

SECURAM is offering a Cyber Weekend deal on its site for shoppers to pick up the next wave of home security before the holiday season. The pre-Thanksgiving sale begins Thursday, November 19th and runs through Monday, November 30th. The sale price for Touch alone is \$199.99; the Touch and the Smart Hub together are \$289.98. Both are currently available on the [website](#) and [Amazon](#).

## About SECURAM Systems, Inc.

Founded in 1991 and headquartered in Southern California, SECURAM Systems, Inc., is best known as the leading supplier of safe locks for applications such as home, commercial, corporate, and ATM safes, as well as bank safes & vaults. In 2006, the company began designing and manufacturing electronic and mechanical safe locks systems to meet the needs of the worldwide safe and vault market. They launched the SECURAM Smart line in 2020.
