

Smart Bitcoin Investments Is Releasing A Bitcoin Calculator For Technophiles And Finance Geeks

Los Angeles, Nov 13, 2020 ([Issuewire.com](https://www.issuewire.com)) - Smart Bitcoin Investments is dedicated to teaching investors how to make smart investing decisions and is releasing a bitcoin calculator so people all over the world can easily calculate the value of their BTC to the fiat currency of their choice.

The bitcoin calculator will easily convert the price of BTC to any fiat currency on-demand including USD, EUR, GBP, AUD, BRL, CAD, CHF, CLP, CNY, DKK, HKD, INR, ISK, JPY, KRW, NZD, PLN, RUB, SEK, THB, TRY, and TWD.

Not only is the bitcoin calculator backed by real-time price data from [Blockchain.com](https://blockchain.com), but also it offers users rates in real-time for several major currencies. Through the calculator interface users have easy access to popular exchanges like Etoro, Coinbase, CEX.IO, Coinmama, Binance, Kraken, Paybis, Bittrex, Paxful, and many others should they decide that they would like to buy or sell bitcoin after viewing the price conversion.

“It is a good idea to have a tool that can help you convert the price of bitcoin to the fiat currency supported in your country,” says Jeffrey Ito, founder of [Smart Bitcoin Investments](https://smartbitcoininvestments.com) and creator of [Bitcoin Calculator](https://bitcoincalculator.com), “and also provide the charts necessary for you to make smart trading and investing decisions”.

Bitcoin calculator is complete with an interactive historical chart. For this release the available charts include market price, total circulating bitcoin, market capitalization, and daily trade volume. Within each chart visitors can customize the time frame they would like to view or select between the last 7 days, 15 days, 30 days, 60 days, 180 days, 1 year, 3 years and all-time. The company has plans to include more charts and tools for future updates so users can enjoy advanced features without having to sign in to an exchange first.

If you have any questions about how bitcoin calculator works or if you would like to get in touch with the owner you can reach out to him using the contact information provided below.
