

## USDCX : The Bitcoin Inc. Fractional Share Token is now available to the public

**Akron, Nov 27, 2020** ([Issuewire.com](http://Issuewire.com)) - Bitcoin Inc. today announced the immediate availability of USDCX, an official Ethereum ERC-20 token, which enables any investor to acquire fractional shares of the Bitcoin Inc. corporation.

The full corporate shares of Bitcoin Inc. were purchased long ago, with the shareholders enjoying the

benefits and dividends that come with owning the shares of a successful corporation. Bitcoin Inc. has secured an agreement with all shareholders through which they are now generously offering fractionally equivalent corporate shares to the public in honor of Bitcoin Inc.'s 10-year anniversary.

This means that for the first time in the history of Bitcoin Inc., fractionally equivalent corporate shares are available worldwide for direct purchase as USDCX tokens. Anyone may now become an official co-owner of the Bitcoin Inc. corporation simply by holding any amount of USDCX in his or her cryptocurrency wallet. Like Bitcoin, the number of USDCX is limited and available on a first-come, first-served basis.

According to Christopher Vanderhorst, CEO, Bitcoin Inc., "We have had an overwhelming number of requests for Bitcoin Inc. corporate shares from interested individuals. Many of those requests, however, were unable to be serviced due to the accredited investor requirements and the limited availability of full corporate shares. USDCX now provides a path to participation for all investors thanks to the tremendous generosity of the current Bitcoin Inc. shareholders."

Founded in 2010 in the United States, Bitcoin Inc.<sup>SM</sup> is the original Bitcoin advocacy organization, created to promote, through education and participation, the widespread public and private adoption of Bitcoin and blockchain commodity systems.
