Verawa World Resorts Launches World´s First Blockchain-Powered Eco-Resort Development in Panama

Panama's Veraguas Province will soon see the development of VERAWA WORLD - the world's first eco-sustainable Resort Development Project powered by Blockchain technology.

Panama, Nov 10, 2020 (Issuewire.com**)** - **VERAWA WORLD Resorts** (VWR) announces major plans for a record-breaking tourism development that will create a new wave of tourism growth for the next decade. VERAWA WORLD will define a new era of hospitality, entertainment, and tourism experiences in the Veraguas.

At a total investment of $225 million, VERAWA WORLD will see a new cutting-edge ecotourism development of 12 individual themed holiday Resorts with exciting attractions, recreation, and lifestyle offerings, spread along 10 kilometers of the most remarkable coastline of the Veraguas.

At the same time, Verawa World Resorts Board of Directors also released a statement saying that **Max van Rijswijk** has been appointed as Chief Operating Office for the company. This comes at a crucial time when VERAWA WORLD is developing a new ten-year vision to drive the future growth and success of the organization.

“Van Rijswijk deep understanding of economic development, conservation, and organizational management evolved through many years of relevant professional experience with various development and conservation organizations around the world. His experience is broad and varied, and he will bring a wealth of knowledge to the job of COO at VERAWA WORLD” said a VERAWA spokesperson.

Verawa World will feature all-audience and family-friendly resorts, attractions as well as themed shops and restaurants. In the coming eight-year period, in line with the development of infrastructure in the Veraguas, managed eco-luxury property becomes a sector that will grow rapidly, along with the development of infrastructure. In any region, infrastructure development is a major trigger to local development which will automatically attract domestic and foreign investors to invest.

This outstanding eco-project will be delivered in several stages with new experiences opening every year from 2022 to a projected completion around 2028. VERAWA WORLD expresses a vote of confidence in Panama as VERAWA embarks on an inspiring journey that will unfasten the full potential of the Veraguas as Panama´s premier tourism destination.

VERAWA WORLD is currently in the preparation phase of its first resort development, called Pure Beach Resort, consisting of 186 accommodations, with biophilic river bungalows, ocean view apartments, and beachfront homes, combined with a spa & wellness center, event center, marina, and exclusive beach club.

This 28-million-dollar project is developed on a stunning 11 hectares beachfront plot and will feature an integrated eco-wellness resort concept. PURE has projected to open its doors by early-2023. The start of the Pure Beach Resort project signals the first phase of the VERAWA WORLD destination as a whole, which will feature 12 individually themed resorts with a total of 3,455 accommodations and 50+ tourism attractions, all located along turquoise blue Caribbean beachfront.

This extensive and unique development offers Property Investors a unique business model based on “OWN”, “EARN” and “ENJOY”. This enables investors to use their properties as their own exclusive lifestyle experience or to rent them out through our innovative **Blockchain Rental & Ownership Pool** to rent the properties to guests and visitors and receive a financial return.

The unique selling proposition of VERAWA WORLD as an international tourism destination is based on the value-for-money of its unique offering. The operations, attractions, accommodations, and pricing strategy have been modeled after some of the most successful Resorts in the world - thus, creating a unique model that will give VERAWA WORLD a core competence over other market contenders in Latin America.
