**Airmont, Nov 19, 2020 ([Issuewire.com](https://www.issuewire.com))** - WebBee a leading application integration service provider has released its first edition of auto [multi-channel fulfillment app](#) for Australia's leading ecommerce store Netohq. Neto in recent times has become immensely popular among sellers and entrepreneurs in Australia that are selling merchandise and goods online. The Neto Multi-Channel Fulfillment app by WebBee offers a Neto seller an exceptional edge in fulfilling and shipping orders of their customers at their doorsteps fast and accurate with considerable ease and efficiency.

The app designed and offering seamless fulfillment efficiency to a Neto seller to ship its orders using Amazon MCF (Multi Channel Fulfillment) services. What makes this app exceptional for fulfilling an order through Amazon FBA is the automated sync of order and inventory details between Neto Store. After automation a seller is not required to log in separately on Amazon and Neto to retrieve important business data. Some important fulfillment specific benefits offered by Neto Multi-Channel Fulfillment App are like:-

- With goods are stored packed and shipped at Amazon Fulfillment centers the app provides immense control over inventory and helps orders to be tracked for shipping.
- With data synced automatically between Amazon and Neto, it improves data accuracy by eliminating manual errors that otherwise can delay overall business processing.
- The app provides protection against the stringent seller policy of Amazon marketplace as a seller can sell from Neto at the same time availing fulfillment from Amazon FBA.
- Easy access to huge Amazon FBA resources including huge fulfillment centers globally, packing

and delivery services by dedicated Amazon staff.

- Enhanced customer satisfaction is the next important benefit offered by [Neto Multi Channel Fulfillment App](#) as it improves process efficiency and ensures accurate delivery while improving customer satisfaction.
- The fees charged by Amazon FBA for Multi-Channel Fulfillment competitively are far affordable and simpler than the 3PL logistics companies. The fee diminishes as far as number of orders increases.

According to the CEO of WebBee Global Abhishek Jain, “Neto Multi Channel Fulfillment App by WebBee will increase customer as well seller experience using Neto store to a greater extent through faster, efficient and accurate shipping of orders”

WebBee Global incorporated in the year 2005 is a leading ERP and application integration company that offers seamless data exchange services between ERPs, Payment Gateways, eCommerce platforms, CRM, and others. Along with integration service WebBee has developed and published apps for fulfillment and ERP integration for market places like Amazon, BigCommece, Shopfiy, and others.
