

Zuggand helps to support the launch of Professional Services in AWS Marketplace

Phoenix, Dec 3, 2020 ([IssueWire.com](https://www.issuewire.com)) - Zuggand helps to support the launch of Professional Services in AWS Marketplace

Zuggand, an Amazon Web Services (AWS) Advanced Consulting Partner, announced today that it is participating in the launch of Professional Services in AWS Marketplace. AWS customers can now find and purchase professional services from Zuggand in AWS Marketplace, a curated digital catalog of software, data, and related services that makes it easy to find, test, buy, and deploy software and data products that run on AWS. As a participant in the launch, Zuggand is one of the first AWS Consulting Partners to quote and contract services in AWS Marketplace to help customers implement, support, and manage their applications on AWS. Click [here](#) for more information.

Organizations from startups to huge enterprises leverage AWS to host their critical business applications. Many of these companies rely on professional services from Zuggand to architect, migrate, secure, optimize, and manage their workloads on AWS. Until now, AWS customers had to find and contract professional services outside of AWS Marketplace and could not identify software and associated services in a single procurement experience. With professional services from Zuggand now available in AWS Marketplace, customers have a simplified way to purchase and be billed for both software and services in a centralized place. Customers can further streamline their purchase of software with standard contract terms to simplify and accelerate procurement cycles.

“Zuggand is proud to be one of the AWS Partners offering our services in AWS Marketplace as part of this launch”, said Aaron Sandeen, CEO and one of the co-founders of Zuggand. “We are passionate about helping companies accelerate their AWS adoption and transform their organization. Now, our customers will be able to have access to our full catalog of services, along with other third-party software solutions, all in one place via AWS Marketplace.”

As an example, Zuggand will offer its [AWS Well-Architected Review](#) service in AWS Marketplace. The AWS Well-Architected Review consists of Zuggand assessing your company's business-critical workloads against the five pillars of the AWS Well-Architected Framework including operational excellence, security, reliability, performance efficiency, and cost optimization.

About Zuggand – [Zuggand](#) is a technology consulting and services firm that helps organizations accelerate their Amazon Web Services (AWS) adoption to transform their businesses. Zuggand is an AWS Advanced Consulting Partner and an AWS Well-Architected Partner.
