Hyderabad, Dec 4, 2020 (Issuewire.com) - Emerging author Naseha Sameen, (www.naseha.world) moved from the hustling metropolis 'Gurgaon' to a city that slips from past to future and from future to present as one traverse from one ally to another. This city, Hyderabad which is inspired by poet, swordsman, and an incorrigible romantic king, Muhammad Quli Qutub Shah. The city reverberates of love between him and Bhagmati. This is the city that inspires the long-forgotten tales.

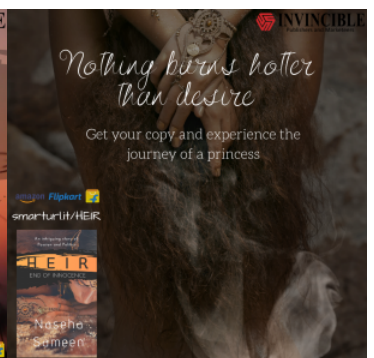

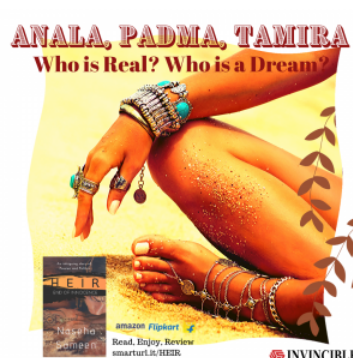

Naseha's debut novel Heir - End of Innocence, the first part of 2 part novel was picked up by Invincible Publications. Winner of 2 awards in Author Page, rated as 5 stars by Reader's Favorite and selected in long list for Story to Screen, the debut novel is getting attention. Well-known writers like "Antar", reviewers and bloggers, who had read the book, have expressed great enthusiasm for the book. Celebrities like Ashmit Patel says it is "Spartacus" meets "Game of Thrones" and Shruti Panwar hope that one day Heir will be considered as a classic; drawing a comparison with classic Lolita.

A princess of sixteen summers, Padmakishori is looking forward to choosing her husband from the princes and kings invited; oblivious to Garvpundir to be on the brink of economic collapse. Her father, the King Rawwal Bikka could see a blood feud looming threateningly in the near future. He has no son to succeed him, and his only hope is Padma's wedding to a powerful king that will buy him time till Padma's son comes of age. This is his last chance to protect his kingdom, and he will sacrifice the dreams of his daughter for it. He arranges a Swaymvaar and plans the events for the king of Jodhgargh, Uday Sangha to win, who had married the young princess only to produce an heir for his kingdom.

Padma realizes that she needs to live life full as she tried to secure her amorous way of life, intertwined with lives and decisions, memories and lives of four generations as she learns the ropes of politics to ensure her son to be the future king of two kingdoms.

This is a story set in ancient India, with elements of deceptions, conspiracy, blood feuds, and continuity of the story. Heir – I: End of Innocence, is a story of strong characters with their flaws leading them through time and generations.
