

Chad R. Kesner, DC, DACBSP, CCCN, CEDP, a Chiropractor with Primary Care & Chiropractic Center

Get to know Chiropractor Dr. Chad R. Kesner, who serves patients in Highlands Ranch, Colorado.

New York City, Dec 31, 2020 ([Issuewire.com](https://www.issuewire.com)) - Dr. Kesner is a skilled chiropractor, a certified chiropractic neurologist & a sports practitioner. He is the President and Medical Director of Primary Care & Chiropractic Center in Highlands Ranch, Colorado.

Unlike conventional medicine, which focuses on attempting to treat disease once it occurs, the chiropractic care offered at Primary Care and Chiropractic emphasizes the importance of improving health in an effort to reduce the risk of pain and illness in the first place. Given the option, most people would prefer to be healthy and avoid illness if possible, and chiropractic care can help those people achieve their health and wellness goals. For those patients who may already be in pain, chiropractic care offers a unique way to provide pain relief for many types of pain and conditions, including back pain, neck pain, and more.

With a broad educational background, Dr. Kesner received his baccalaureate degrees in Human Nutrition & Anatomy and Physiology from Colorado State University. He also achieved his Doctor of Chiropractic degree from Texas Chiropractic College and attended his internship rotation at Hermann Hospital at MD Anderson Medical Center, which encompassed spinal and traumatic neurosurgery.

Since then, he has completed post-graduate training and has obtained degrees in the following programs; DACBSP (Diplomate of the American Chiropractic Board of Sports Physicians) through Northwestern Health Sciences University, CCCN (Certified Clinical Chiropractic Neurologist) through Parker College, and CEDP (Certified Electro diagnostic Practitioner) through the National University of Health Sciences. He is also Level 1 Workman's Comp accredited and has obtained post-graduate certifications in dry needling.

In November of 2019, Dr. Kesner became Director of Clinical Operations at Regenerative Medicine of the Rockies - a role he holds to this day. He is also on the Board of Directors at the Colorado Integrated Care Network.

Chiropractic is a form of alternative medicine that mainly deals with the diagnosis and treatment of mechanical disorders of the musculoskeletal system, especially the spine. A chiropractor uses spinal adjustments, manipulation, and other techniques to manage patients' health concerns, including neck pain, back pain, headaches, vertigo, and a long list of other ailments and conditions. They aim to improve patients' functionality and quality of life by properly aligning the body's musculoskeletal structure and enabling the body to heal itself naturally, without the use of medication or surgery.
