

Creating Blockchain Opportunities for India's Upcoming Students

A paradigm shift in the blockchain ecosystem

Mumbai, Dec 22, 2020 ([Issuewire.com](https://www.issuewire.com)) - India Blockchain Alliance and the Dragonchain Foundation have taken on a partnership to create opportunities for students across India. The India Blockchain Alliance is playing a vital role in getting upcoming talented students familiar with blockchain technology.

India Blockchain Alliance along with key partners is demonstrating visible social impact in several domains. The collective efforts and technology interventions are creating socio-economic impact and drive evidence-based initiatives in the India region.

"Our partnership with Dragonchain sets the pace for a transformational paradigm in India. We are very excited to be a part of Dragonchain's disruptive technology and platform. It will not only skill up students in India to implement blockchain projects, but also give our youth and students the opportunity to tap into the global market for disruptive blockchain jobs", said Mr. Raj Kapoor, founder of the alliance. "This strategic partnership will be an integral part of our Centres of Excellence initiative that we are rolling out in partnerships with prestigious academic partners."

The Dragonchain Foundation already has a blockchain-based learning management system with free courses and certifications available and plans to roll out new courses tailored to students of the India Blockchain Alliance. The Alliance and Dragonchain will host hackathons with students nation-wide and make developer bounties available to them.

"Dragonchain Foundation's focus has always been on education. This initiative will have direct social impact empowering many lives and impacting many futures. We are honoured to be a part of the

curriculum.”, Trey Rutledge Director of Strategic Partnerships. “We are honored to be a part of the curriculum.”

Already over 1000 branches from over 400 private universities have partnered with the India Blockchain Alliance all focusing on specific fields of study. There are only a few states in India that are leading the way in terms of blockchain initiatives. By combining our efforts Dragonchain and the India Blockchain Alliance aim to bring blockchain education and opportunities accessible to every student in India.

About India Blockchain Alliance

The India Blockchain Alliance will be a key player in the process of creating a setting that will transform India into a global blockchain destination. The members will work harmoniously and in unison for the benefit of the individual and collective business development of blockchain companies. Established in 2018, The India Blockchain Alliance (IBA) is the most influential voice in the blockchain industry. It is a not-for-profit organization that promotes evidence-based adoption of Blockchain and Distributed Ledger Technologies (DLT) across the public and private sectors.
