

Cybersafe Solutions' Rosana Filingeri Named One of CRN's 2020 Next-Gen Solution Provider Leaders

CRN Highlights the Rising Stars of the IT Channel

New York City, Dec 4, 2020 ([Issuewire.com](https://www.issuewire.com)) - Cybersafe Solutions, a 24/7/365 advanced cybersecurity provider, is pleased to announce that [CRN®](#), a brand of [The Channel Company](#), has recognized Rosana Filingeri, Vice President of Business Development, as one of its Next-Gen Solution Provider Leaders for 2020. This list recognizes exceptional individuals who have made significant contributions in driving growth and strategic direction over the last year to the channel companies they work for, including integrators, VARs, MSPs and other solution provider organizations.

The inaugural Next-Gen Solution Provider Leaders list includes rising star executives, directors and managers, 40 years of age or younger, who are poised to be tomorrow's channel leaders.

As the Vice President of Business Development, Filingeri develops and manages major partnerships to support and extend Cybersafe's client base.

"I am humbled to be recognized as a Next-Gen Solution Provider Leader by CRN," says Filingeri. "Over the last few months, there have been many uncertainties. We've rapidly expanded our channel program so our partners can assure their clients that their cybersecurity programs do not need to be one of those uncertainties. Together, we can provide clients across the globe with visibility to address cyber threats of today and tomorrow."

"CRN's Next-Gen Solution Provider Leaders list honors IT channel up-and-comers who are blazing a path forward to the next era of the IT channel," said Blaine Raddon, CEO of The Channel Company. "We congratulate the individuals on this year's list for bringing fresh ideas and new ways of delivering success that are setting the pace for the rest of the channel."

The Next-Gen Solution Provider Leaders list will be featured in the December issue of CRN Magazine and can be found online at www.crn.com/NextGenSPLeaders.
