

eWorkOrders Recognized as the Highest Rated CMMS Provider In 20 Categories for 4Q2020

Raritan Township, Dec 2, 2020 (Issuewire.com) - eWorkOrders has been recognized as the 2020 industry leader in computerized maintenance management system (CMMS) solutions for companies of all sizes, by Gartner Digital Markets, Capterra, GetApp, Software Advice and Digital.com.

Recognized as the highest rated in the following rankings: Best Value, Ease of Use, Functionality and Features, Customer Support, and Most Recommended for various software categories including: CMMS Maintenance Management, Facilities Management, Public Works and Fleet Management.

Category Leader and Front Runner for Work Orders and Fleet Maintenance. The Best Asset Tracking Software Solution. Ranked #1 for Maintenance Management and Facility Management Category Leaders. Additional 2020 awards can be found at <https://eworkorders.com/cmms/cmms-highest-rated-provider-eworkorders-awards>.

“We are excited for the recognition given to us by the Gartner Digital Markets, Capterra, GetApp, Software Advice and Digital.com as leaders in these CMMS categories,” said Jeff Roscher, President and Owner of eWorkOrders (Information Professionals, Inc.). “We continue to work hard to support our customers with updated technology, streamlining processes, and providing high-quality web-based services at an affordable price. We are extremely proud that our customers are excited and take the time to share their experiences about eWorkOrders and how our CMMS solution has helped their businesses grow. We continue to work with our customers in providing them with a solution that best fits their needs. We listen to our customers and are continually enhancing our CMMS tools to give them the best applications to meet their growing needs.”

eWorkOrders CMMS software has been an established player in the market for over 25 years, providing companies with first-class maintenance and facilities management software, best practices and expertise. eWorkOrders is used throughout all industries by market leaders and has been the recipient of many Five Star awards.

About eWorkOrders CMMS

eWorkOrders is easy to use, affordable and powerful, web-based CMMS that helps organizations easily manage and report on daily operations and plan for future requirements. A CMMS provides the tools and features to help manage and track service requests, work orders, equipment/assets, workers, inventory levels, expenses, and more. Some of the benefits of implementing a CMMS are to improve accountability, decrease business disruption due to equipment downtime, keep historical information on repairs and issues for better preventive maintenance scheduling, extend the lifespan of assets/equipment, provide better distribution and management of resources, and be able to create detailed and accurate reports on your organization's activities. Implementing a CMMS will help minimize expenses and maximize ROI (Return On Investment).
