

Icoclone Offers superfine STO software to all startups and Enterprises

The graphic features a dark blue background with a glowing yellow text box on the left. To the right, there is an illustration of a man in a suit holding a briefcase, standing next to a large purple screen displaying 'STO'. A stack of gold coins is placed between them. Below the text box, there are three contact icons: an envelope, a WhatsApp icon, and a Telegram icon. At the bottom center, there is a yellow circular logo with a stylized 'C' and the website address.

Madurai, Dec 9, 2020 ([Issuewire.com](https://www.issuewire.com)) - Icoclone is an exemplary STO development company in the blockchain industry. We have years of experience in offering premium STO launch services with top-notch outcomes. Started by the chief official at Icoclone.

As of now, Security Token Offering is the hot talk of the town. It is a type of crowdfunding platform and has gained much importance in recent days. Thus, most of the countries have accepted them to be the crowdfunding scheme. So we have adopted them in our development services.

We have a rich set of expertise in STO Development. Initially, we will gather unique business requirements from the clients. Once the requirements are gathered, we will come with an innovative idea to process them.

Security token offering is a fundraising platform where only the security token sales will take place. Thus, one can purchase only the security tokens in STO's. Security tokens are completely backed with real-time assets. So it contains the ownership information of the investor. All these pieces of information will be noted and recorded digitally in the blockchain. You should do all these processes under the SEC rules and native government rules. This crowdfunding platform provides high-end security to investors and reduces the risks of token issuers.

One can launch a secure STO website instantly using our premium Security token offering software. Our #1 priority is to come up with a unique STO Platform that helps startups and

entrepreneurs to double the profits, said the Chief Official at Icoclone.

Here is the set of elite features, that we integrate into our STO script software

- Supports Fiat and multiple Cryptocurrencies.
- The launched tokens are legally compliant with SEC Guidelines.
- Security Token Creation.
- Secured Wallet Integration.
- Global Investor Participation.
- Compliant KYC/AML solutions.
- Asset Fractionalization.
- Investor Contract Management.
- Customized Smart Contracts.

Icoclone offers security token development services. Such as the creation of Debt Tokens, Equity Tokens, and Asset Tokens. All these Tokens are completely intended to help investors with their businesses.

We always have a habit of collecting feedback from our clientele. With that, we would enhance our STO launch services in the future. Our STO software is completely customizable and can be modified as per your business requirements. Ended by a Senior Official at Icoclone.
