

Manmaicha Solar Generator Factory Supply 3000W Power Inverter Can Be Trusted In Need

The emerging solar powered generator manufacturer and marketer introduced their 3000W power inverter for safe and reliable power.

Bonnet Bay, Dec 18, 2020 (Issuewire.com) - Manmaicha, the upcoming **power inverter china** company has released its high frequency, pure sine 3000W model inverter for catering to a wide range of power needs. This inverter can run a few lights, refrigerators, microwaves, laptops, etc.

High frequency, pure sine wave inverters include cutting-edge technology and can protect the most sensitive electrical appliances. Sine wave Inverters suffer very low distortion and deliver power similar to the electric supply. It also helps to run the electrical motors and devices faster and quieter without a temperature rise. It can convert Direct Current obtained from solar and other sources of renewable energy into Alternating Current for running a host of standard devices and appliances. All these make it a trustworthy inverter in need.

Located in Shenzhen, China, Manmaicha Power Station Company Limited was incorporated in 2015. It's headquarter is located in Hong Kong. Since the time of inception, the company is manufacturing and marketing photovoltaic (PV) inverters, [portable power stations](#), inverter generator, solar charge controllers, solar batteries, and various other related solar products.

"This added a new feather to our laurel. It is a great achievement as [power inverter suppliers](#). Our Research and Development wing works continuously for developing existing products and also innovating new products. Our products are made from premium quality material and deliver safe and reliable power," said a spokesman for the company. "We are authorized **power inverter suppliers China**. There is a great demand for this product. Our yearly production is 6 million inverters and the sales volume is around US\$100 million," he further revealed.

The [3000W power inverter](#) is extremely powerful and delivers continuous power with a 1.0 power factor. It features battery reverse polarity protection, adjustable solar and AC priority, output frequency that can be adjusted in the LCD menu, and a bypass button. The inverter can deliver a maximum charge current of 30 Amperes. All of their products meet the requirements of SAA, CE, SONCAP, and ISO9001 certification making them the most reliable inverters.

Sunwind also has a large production line of 10,000 square meters. They employ over 260 skilled workers. The company use cutting-edge technology and produce their products with professional care and attention for meeting the needs of customers.

As a part of its campaign to ensure unmatched customer satisfaction, the company provides 24/7 unique customer services. Visit <http://www.manmaicha.com/> for more information.
