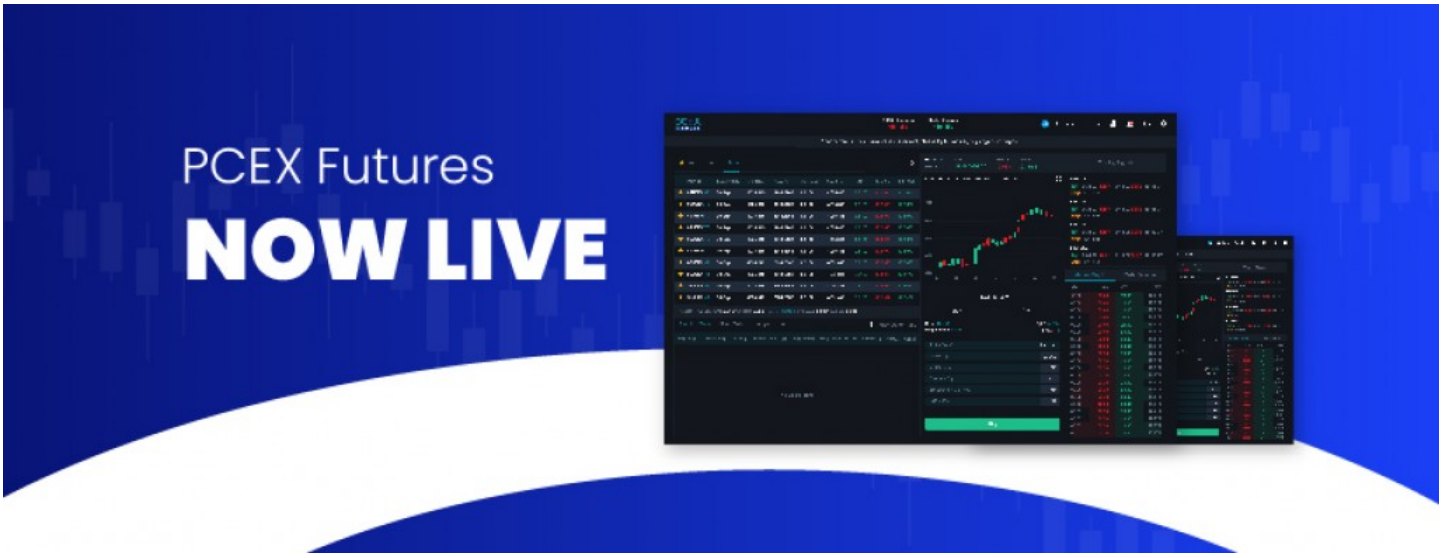
PCEX Member Launches PCEX Futures Priced in C2USD



New Delhi, Dec 8, 2020 (Issuewire.com) - PCEX Member, Asia's safest ad India's fastest cryptocurrency exchange today announces the launch of its new product PCEX Futures to give Indian traders more opportunities of investment for making profits. PCEX Futures contract is a virtual derivative contract that is quoted and settlement in C2USD and each contract has a face value of a fixed amount of digital currencies. By introducing futures contracts in lot sizes, PCEX Member becomes the only cryptocurrency exchange in the world that enables traders or investors to buy numbers of contracts in one transaction. Moreover, it becomes the only cryptocurrency exchange in India that works on the NSE or BSE model and enables users to book maximum profit in the futures market at the lowest investment.

The exchange provides a wider derivative portfolio with greater varieties of lot sizes in the C2USD market to cater traders of all levels. From mini BTC contracts to FCC contracts of a lot size of 500, all contracts are available with up to 30x leverage levels. C2USD pairs on PCEX Member include BTC, LTC, ETH, FCC, and BCH. One can buy XMR/C2USD and DASH/C2USD contracts as well on the platform for 10th December 2020.

Sandeep Phogat, CEO and Founder of PCEX Member, said, " the launch of PCEX Futures, a stablecoin based derivative contracts will not only make trading simpler for users and but will also help them in calculating the risks before entering into the contract". We have the most competitive future products with lots of innovative features that will meet the user's trading requirements. He further added.

Key Features of PCEX Member Futures Contracts Includes:

- **Lot sizes:** From mini BTC contracts to larger contracts, multiple lot sizes are available to cater traders of all levels.
