

Strength H2O Industrial Solutions Voted #1 Disinfection Services Michigan

Strength H2O Industrial Solutions provides professional & reliable office disinfection and decontamination services to stop the outbreak of the coronavirus at workplaces throughout the state of Michigan.

Troy, Dec 31, 1969 (Issuewire.com) - The coronavirus has been declared the pandemic and it is seemingly untamable as the numbers begin to soar again in Michigan. Michigan reported another 8,080 new confirmed cases of coronavirus on Saturday, the third straight day of at least 8,000 but still below

last week's high of nearly 10,000. Both Oakland County (1,058) and Wayne County (1,048) reported more than 1,000 new cases on Saturday.

For the month of November, Macomb has had the most deaths with 162 and has had 1,211 overall since March. Kent County has had 153, the second-most in November, nearly half the county's 338 deaths since the pandemic began. Saturday's testing data show that 11.7 percent of just over 57,000 tests came back positive, rising from the previous 10 percent mark on Nov 6. Alcona, Muskegon, Benzie, and Arenac are over 20 percent over the past week and another 12 counties, including Macomb County, are at 18 to 19.9 percent. Friday, Nov. 28 17,162 cases over two days.

Strength H2O Industrial Solutions Disinfection and Decontamination Services provide sanitized workplaces using CDC and EPA approved disinfectants with a broad kill spectrum. Their signature 3-step disinfection process provides the highest level of protection available with every customer receiving free adenosine triphosphate (ATP) testing to provide customers with an additional layer of protection knowing their facility was cleaned correctly.

"With a staff of 173 and running around the clock we can service the entire state of Michigan, in most cases with 90 minutes. Last week we pass 100 million SQFT of sanitation as a company! The biggest piece of advice I would give Michigan business owners is that if a company is offering disinfection services and can not provide free on the spot ATP testing, then do not use them. When the coronavirus first broke out there was 2, maybe in the entire state that would disinfect infectious disease, now there are 100 or more. Do your homework on the company. "

Scott Milbank | Strength H2O Owner

Strength H2O offers [Michigan Disinfection and Decontamination Services](#) provide sanitized workplaces using **CDC** and **EPA** approved disinfectants with a broad spectrum kill claim. Strength H2O's [Michigan coronavirus 3-Step Disinfection Services](#) offers facility owners/managers protection for their staff and facility against the coronavirus.

Step-1 Electrostatic disinfection: Electrostatic disinfection sprayers utilize electrically charged tips on the end of the sprayers to add a positive charge to droplets that literally seek out and wrap bacteria, viruses, and germ-infested areas in a negatively charged world. Electrostatic droplets tend to repel each other and not overlap, which provides for uniform dispersion and virtually 100% coverage of the area that is being sprayed. Therefore, being one of the most effective processes to treat an area affected by Michigan coronavirus.

Step-2 Spray And Wipe: Our highly trained professional spray and wipe all surfaces 10 Ft down. Hand clean, disinfect all high touch

Step-3 Final Electrostatic Disinfection: The final Electrostatic disinfection is light and does not leave any residue or strong smell. As soon as we complete this step, you can reenter the facility without any fears of catching the virus. areas providing an additional layer of protection for your company.

Strength H2O Industrial Solutions mandates that each member of their staff **undergo at least 84 hours of training before starting** the 2 weeks off in the field training process. From what we have researched, they are definitely the most trained disinfecting company in the state of Michigan. Offering a broad range of facility disinfecting services ranging from a one-time service, to around the clock disinfection, or weekly services. Strength's prices stay the same regardless of the time of day, or if you have a positive coronavirus outbreak at your facility.
