

Techugo; A Message From Our Founder & COO

Nepean, Jan 6, 2021 ([IssueWire.com](https://www.IssueWire.com)) - *To All The Techugo Family,*

For almost a decade, the Techugo family has served different businesses and thousands of ideas to find their niche. Today, our world is facing a challenge and uncertainty that was never imagined before. The new challenges erupting out of it, have dramatically affected everything from tip to toe.

This is the most challenging time we've ever faced, and the length of the disruption caused by different business remains worryingly unknown. When systems got paralyzed and the damage caused was beyond imagination even, Techugo emerged as a winner.

Thank you all for being you

I am falling short of words to express the immense pride and gratitude I have for each of you. Techugo family, each and every one of you demonstrated support for one another, and the thousands of customers we serve. You all burnt midnight oil, to grow stronger and protect as many businesses with our digital solutions as possible.

You all did much more beyond your capacity to keep those businesses afloat who trusted us to pave a way for them through a digital curve amid the pandemic.

Glad to mention, being the reason behind raising funding for more than 17 startups during these hard times, of more than \$47 M. And will continue this journey in the year to come.

My passion has always been creating a business that not just improves employees' lives but also gives them a reason to grow. Worth to mention, during this period, we have created hundreds of jobs for our global office locations. We hired for 30+ new roles and stayed firm on our decision not to deduct remuneration from any of the team members.

When every second company started to work from the office location, we decided to continue with WFH policy, since you all are precious to us and cannot compromise your health and safety with any amount or loss of work.

Be there for each other!

Amid these overwhelming and difficult times, the Techugo family has shown up the courage and stayed honest to the mission and commitment, our company stands for. Together, this challenge will be won over, and Techugo being a [global mobile app development company](#) will build a stronger community.

Thank you, and please stay safe.

Thanks,

Ankit Singh
