kolkata, Dec 19, 2020 ([Issuewire.com](https://www.issuewire.com)) - I always wanted to pursue a career in the advertisement as I liked how a single advertisement could either break or make a company. I knew that I wanted to pursue a career in advertisement but I didn't know where to start or from whom to ask for guidance.

Building and learning advertisement is a complex process and it requires detailed understanding and guidance. It is hard to find a place in this world where detailed instruction and guidance are provided by any guru or professional also at your convenient place and time. There are many idols that we look up to but never in our dreams have we ever thought of having a one to one conversation with them or asking them for guidance, and listening to their success-failure story. I too was desperate to learn but was not sure of which road to take, which path to follow, or from whom to ask for guidance. There were thousands of questions in my mind but not a single answer was received. It was when I lost all hope and thought of ending my dream of pursuing a career in the advertisement that I came across Xpert.

I took help from the professionals in Xpert, who are the top advertisers that I look up to. They gave me direction and told me their part of the story and how to reach my goal and pursue my career further in advertising. I got to learn from them the most creative and interesting advertisement works that the world has ever seen. Now I am confident in pursuing advertisement as my career and I believe and preach that one should always follow his/her dream and if you want something desperately you will always find a way out.
