

Yard Card Websites Launches New Services

Eustis, Dec 21, 2020 (IssueWire.com) - Lake County Computers (www.lakecountycomputers.com), a leading provider of digital marketing services announces today the launch of Yard Card Websites (www.yardcardwebsites.com), a web design and search marketing subsidiary focused on the yard greeting rental service industry.

Yard Card Websites is a digital agency that will focus solely on delivering real-time booking & payment websites as well as search marketing and related services for the yard greeting rental service industry.

Yard Card Websites offers professional website design & development services in carefully crafted packages intended to meet the budget restraints of Yard Card business owners. "Most of the Yard Card business owners are doing this as a second job and don't have a large budget to get an automated website in place." says Jon Juriga, Founder at Lake County Computers. "We want to give them access to resources that typically only larger companies can secure, so we created Yard Card Websites." adds Juriga.

The flagship service offered is custom designed, responsive website that allows customers to book a service in real time and pay online. "We've had very positive feedback on our digital solutions, specifically our real-time booking solution with point of sale." Says John Miller, Manager of Business Development at Yard Card Websites. "Everybody loves it." adds Miller.

By continuing to provide a wide variety of digital solutions, Yard Card Websites supports our clients increasing need to utilize technology for online visibility, sales and management.
