

Auto Affiliate Links 6.0 has been released

The 6th major version of Auto Affiliate Links has been released. Ten years ago, on 14th January 2011, Auto Affiliate Links was first published in WordPress plugin directory.

Palo Alto, Jan 13, 2021 ([IssueWire.com](https://www.issuewire.com)) - The 6th major version of Auto Affiliate Links has been released. Ten years ago, on 14th January 2011, Auto Affiliate Links was first published in the WordPress plugin directory.

Auto Affiliate Links is a WordPress plugin that automatically adds links to website content, based on specific keywords.

Auto Affiliate Links 6.0 comes with a lot of features and improvements suggested by its users and community around the plugin. The most important upgrade was the click tracking feature. Auto Affiliate Links users will have the ability to see how many clicks each link and each keyword automatically added received. They can also see a list with the latest clicks on automatically added affiliate links, along with the page they were on when they clicked, and which link they clicked on. With this feature, it is easier to see which links and keywords are performing and which don't.

Here is a list of the most important features added since the last major version was released:

- Click tracking statistics
- Added support for WP Multisite
- Added option to check if added links are broken
- Improved link insertion controls
- Added options to improve link insertion
- Feature to disclose affiliate links
- Improved the design of administration pages
- Added individual settings for links
- Added individual options for posts or pages
- Allowed the plugin to be used as a link Cloaker
- Added independent settings for internal links
- Added an administration page to see the links generated by the plugin
- Added Amazon product widget at the end of each post
- Improved exclusion options
- Enabled display of affiliate links in sidebar widgets
- Ability to add links in content created by other plugins: BuddyPress, WpForo, Elementor, TablePress, WP Recipe Maker, PeepSo, Advanced Custom Fields, BBPress, etc.

You can download Auto Affiliate Links 6.0 from the WordPress plugin directory:
