

Automated welding machines are here in Australia!

ITM Australia announces its readiness to supply world-standard quality Automated Welding Machines and Accessories!

Queensland, Yatala, Jan 21, 2021 (Issuewire.com) - The need for using Welding Machines in Engineering factories is immense. In day to day's work schedules, there will always be some minor repairs to be carried out to the machines, and other installations by inhouse mechanics. Now, this need can be fulfilled wonderfully by the [welding automation](#) technology now available.

The announcement made today by ITM Australia comes as a boon for the Engineering Industry. This leading Wholesale Tools Suppliers have elaborately mentioned about the Automatic Welding Machines and Accessories, they are able to supply all over Australia.

Customers visiting their website can view the full details with pictures about the high-tech Welding Machines and Accessories published there. To quote a few – Accessories to suit GECKO and Lizard; Track Systems; Dragon Oxy Cutting and Beveling Carriage; ITM "GECKO" High-Speed Welding Carriage; ITM "GECKO" Welding Carriage; ITM Mini Spider Welding carriage; ITM Railtug Track based Welding Carriage; ITM "LIZARD" Welding Carriage; and Rail Bull 2 Welding Machine etc.

As regards Automated Welding Machines – ITM has the following description to make for the benefit of the Customers namely –

“Our range of automated welding machines, each with their own benefits and features, are ideal for both the simplest and most complex welding jobs, and for both horizontal and vertical welding. With programmable machines available as well as 4WD and magnetic base machines, each welding carriage is available with a large variety of accessories such as magnetic tracks and multiple torch clamps to make them suitable for a large range of welding tasks”

With regard to Portable Welding Machines – these are the words of description by ITM –

“Our welding automation carriages can be programmed to move along a flat surface or track to deliver a precise and highly accurate hands-off weld. Once set up correctly, the weld achieved will be completely straight and the hands-off, fully automated functionality makes the welding job safer for the user.”

By this announcement, ITM explains that their Company has 28 years of experience in catering to the demand of Industrial, Hardware retail, and Automobile retail markets in Australia. As of now, they have their product line grown to over 5000 products and accessories, apart from 6000 spare parts.

It insists that by establishing a supply contract with them, the Customers can feel relaxed, since the monthly requirement schedules for powered equipment, air tools, metal cutting and drilling tools, fabrication and workshop equipment, air hoses and air hose reels, together with all kinds of industrial tools can be given to them.

The supplies will be made accordingly, within the time frame and with an enormous saving in costs. They have a national presence, meaning their distribution center is located at Yatala, Queensland and offices are located at Tanzania, Western Australia, South Australia, and Victoria. Customers can get Product Solutions as well as Technical Expertise from them whenever needed.
