

China Portable Power Station Factory Manmaicha Release 1000W Solar Generator For Camping

Now Offering Mini Solarr Generators Manufacture in Custom Colors and Logos

Hawaii, Ewa Beach, Jan 22, 2021 (Issuewire.com) - Sunwind Power Inverter is a leading portable power station manufacturer and supplier in China. They are known for their innovative solutions in photovoltaic applications. Some of the bestselling products that have also gained immense popularity are portable power stations. The fully certified 1000W high power inverters are backed by Sine Wave Current. Multiple devices can be charged with the help of one power station. A mobile phone can be charged up to 30 to 35 times and a camera can be charged up to 25 times. A car refrigerator can go up to 10 to 12 hours with single charging and a laptop can be charged up to 8 to 10 times.

As the leading [portable power station suppliers](#), Sunwind ensures that all its products meet the highest quality parameters not to forget the features and functionality. These portable power inverters are defined by high power, high-performance batteries, and large-capacity. They are also supported by temperature protection, overload protection, over-discharge protection, short circuit protection, and overvoltage protection. This means that they are totally safe for both indoor and outdoor use. They are so portable and light in weight that they can be carried to picnics and other outdoor activities.

The [portable power station factory](#) is equipped with state of the art machinery and uses firm and reliable materials to manufacture all their portable power stations. The outer shell is fire resistance, shockproof, corrosion resistance, anti-fall resistant, high-temperature resistance, and last but not least excellent insulation. With a safer overall structural design, the battery compartment is better distributed for a better circuit layout. And what's more attractive is that it is as comfortable as carrying a hand torch or a flashlight. And since it can be charged in multiple ways, these portable power inverters are sure the safest, convenient, and versatile pieces of equipment.
