Clynk MagicBox- A magical fight back against Rapid Digitalization

Growing technology innovation company

Maharashtra, Mumbai, Jan 25, 2021 (Issuewire.com**)** - Whether we realize it or not, innovation has leaked in profound into our lives and infested through the vast majority of our everyday tasks. Everything from how we eat to how we travel is bound with technology and this is rapidly causing the world an easier place to live in. In India too, the technological revolution is well in progress. From simple apps to playing games on our phone, we've arrived at the stage where AI permits us to step inside the game and live it. Throughout the rapid change in technology, the CLYNK-Magic box helps to step up in this modern scenario.

CLYNK-Magic box, the India-based single-board PC and digital content distribution device designer is an Asian tech example of skyrocketing story. The innovation of the CLYNK-Magic box encourages you to this new technology are intended to make your life simpler.

With the development of internet access, content utilization habits are changing. We at this point don't depend on the 9 PM Friday night premiers of movies or tune in Wednesday nights to catch our favorite TV show episodes. Real-time content over the web and viewing your number one film and TV shows at your own accommodation have changed the manner in which the way we consume content.

CLYNK-Magic box plans a small factor box and multi-practical gadgets that are utilized in a large number of consumer top choices, including IPTV, OTT, STB, IOT, and PC, and many more. This technology is progressively utilized in the growing Internet of Things industry. Clynk MagicBox is a team of stunning individuals endeavoring to fabricate great and most innovative products. Clynk MagicBox's team is a mix of prepared and skillful resources of over 50 years of involvement with plan and development of hardware, electronic circuits, installed programming, working frameworks, and so on, their team is continually flourishing to plan and construct generally innovative and cutting edge customer and modern items.

By the time CLYNK have acquired the pride of being one of the remarkable tech organizations on the planet by creating a single load up PC system that helped them with hanging out in customers mindset and stay ahead in the present serious business environment. The team at Clynk are focused on consistently put forth an attempt to improve our process, plan, and innovation, this keeps their group side by side with best in class mechanical and market patterns and assists with making generally new, advance, and refreshed products. At CLYNK Technologies, they convey multi-dimensional IT items and services that oblige top of the line convenience and utility of the purchasers across the globe. CLYNK has dominated in catering wide and differed scope of Multi-functional products and services such as including IPTV, OTT, STB, IOT & PC, and many more that can suit all specialized requirements of their customer base.

The 2020 worldwide pandemic has been a reminder for some associations to adopt remote working. Indeed, even associations with the most unbending arrangements have grasped the remote working model and permitted representatives to work from home. CLYNK offers you a chance to work with work from home tools, to make things simple for you. Also, CLYNK gives a platform to the building and changes over any TV into hybrid multi-functional devices. The magic box helps the users by finding the best conversion model for their data. User can simply convert their television into a multi-purpose device and use it as a Media box (OTT Apps, Live Television, Music, Images, etc.), or Personal Computer (Email, Office, Video Conferencing, Machine Learning, Data Mining, etc.), Social Connect (Facebook, Instagram, Twitter, Google, etc.), Gaming Console, Tele Medicine Box with connected diagnostic devices, Educational Box (Online and interactive education on a large TV to reduce vision-related problems compared to Mobile devices), IOT- Internet of things (Smart Home, Elder Care, IoMT- Internet of Medical Things, Building and Home Automation, Manufacturing, Agriculture, Metropolitan Scale Deployment, Energy Management, Environmental Monitoring, and many more), E-commerce and many more.

Mr. Kiran Arya and his valuable team are very of high eager soul who needed to make a novel space for them in this period of digitization, so they put their hard-end endeavors for CLYNK's Magic Box and after outrageous difficult work and experimentation and obviously serious R&D of three years, they have planned and built up world's first multi-reason Single board PC. They have the most experienced and devoted team of engineers, designers, and researchers who guarantee of keeping up excellent norms and the help conveyance on schedule.
