

# Decentral Games makes a monumental announcement on its DAO move

Marking the first-ever DAO-governed virtual land development entity

**Tortola, Road Town, Jan 20, 2021** ([IssueWire.com](https://www.issuewire.com)) - Built-in Decentraland, Decentral Games is the first-ever metaverse casino owned by its users and provides provably fair casino games in a 3D metaverse. Since its main net launch in December, it experienced exponential growth of over 800 users with total bets of \$8 million USD and a total locked value of \$5 million USD in just six weeks. Decentral Games now ranks one of the tops on the dApps charts and its token (DG) is trending on [Coingecko](https://www.coingecko.com).

On **January 20**, Decentral Games announced the addition of 400 Decentraland LAND parcels to the DAO wallet – a \$500,000 USD market value. Now, \$DG token holders who create community proposals can vote to build out casinos, games, art galleries, and more on any of the 400 LAND parcels in the \$DG DAO. This move will secure future expansion and boost the platform even further.

“This is a significant move for all Decentral Games’ stakeholders and communities, especially for the \$DG holders knowing that vigorous expansion and growth are on the horizon. Moreover, to add even more value into the \$DG DAO, we will be transferring 3000 DG (over \$150,000 USD, at time of publication) to the DAO to manage and allocate towards grants, development, marketing, etc.” said the Project Lead of Decentral Games, Miles Anthony.

## About Decentral Games

Decentral Games is the world's first community-owned Metaverse Casino. It is part of the bigger ecosystem of Decentraland, powered by the Ethereum blockchain.

## About Decentraland

Decentraland is a decentralized virtual world governed by its users through a DAO (decentralized autonomous organization). The platform is powered by the Ethereum blockchain. Within the Decentraland platform, users can create, experience, and monetize their content and applications.
