Nanyang, Jan 10, 2021 (Issuewire.com) - Planer & Jointer are terrific tools for woodworking and DIY projects of all kinds, but over time, their blades can wear down and need to be replaced. A new planer blade can bring your planer back to life, helping you slice through working on wooden surfaces to create perfectly planed surfaces.

You may be ever used some original blades or USA OEM brand blades before, but usually expensive.

In order to provide better and higher quality products for the woodworking industry around the world, we created the brand FOXBC in 2019.

Remember me: [FOXBC](#).

FOXBC offers the highest quality and affordable power tool replacement blades. Help you save 40% of the money from original blades and other brands.

WHO IS FOXBC?

FOXBC is a professional and reliable factory producing planer & jointer blades. We have provided millions of replacement blades for many major brand planers in the world Since 1999. We understand the production process of woodworking tools very well and have extensive manufacturing experience.

Our goal is to help woodworkers and artisans across the world to get their most affordable replacement parts.

[FOXBC](#) devotes to the market investigation of the woodworking industry, research, and development of woodworking replacement planer blade products all the time and it is the professional of wood planer machinery and mounted alloy planer tool.

The planer blades manufactured by us have been sold to USA, Canada, Australia, South-East Asia, Europe, Middle East, Africa, and other counties and regions, which have won high customer reviews and already owned many loyal fans and customers.

How to Select the Correct Wood Planer Blade?

If you've ever tried to plane a piece of wood with a dull or inferior blade or order mistake size blades, you will know just how difficult it is.

Looking at the FOXBC shop you can find the correct model and trust.

To help with the process of finding the best wood planer blades the save money, we've created this brand. Within it, we've listed global power tools wood planer blades model that *aims* to please a range of customers and find correct blades.

Pay careful attention to the various specifications of each, and look at the cost in comparison to what's being offered. This will help you find a planer blade knife that suits your planer.

Failure to take note of your current planer brand and blade size system will result in the wrong planer knives being purchased for the task.

Safety--with this in mind, it's important to always keep your wits about you when working with planer knives.

Whether you're removing or installing them, sharpening or cleaning them, it's vital that you keep your focus on the task at hand. Keep your fingers and hands out of the way, and be gentle with each movement.

Help you improve job efficiency:

To ensure your planer to get the maximum work efficiency, The most important thing is that you know which kind of blade is right for your planer. You can find this information in the manufacturer's manual which you may have gotten with your power planer.

The FOXBC features of each blade vary dramatically. This is because they have to suit the model of your planer.

Smooth back planer knives – short, thick, and have a sharpened edge either on one side or both.

Portable planer blades – long, thin, and feature various holes for easy installation into a planing machine.

Quick change planer inserts – they are beveled, thick, and long for easy installation.

Carbide inserts knives – these come in various shapes and sizes for a range of planers.

Carbide or carbide-tipped knives require less sharpening than HSS knives.

Custom-profile knives – these are carved in various shapes to enable you to plan various shapes.

Maintenance:

The key to a good planer is caring about it. If you don't care about your planer, and maintain it to keep a high standard on a regular basis, you will notice a dramatic drop in the quality of the work produced.

You also should keep your blade sharp all the time, free of nicks and imperfections, and free of rust. After periods of heavy use, it's important to use mineral spirits on manual hand planer blades and to clean, replace and sharpen electric planer blades as well.

Remember me: FOXBC.

FOXBC is proud to offer a replacement for planer blades, planer belt to keep your woodworking DeWalt planer cutting cleanly for the best results.
