Sachin Yadav, Managing Director of [Kay Bee Bio-Organics Private Limited](https://www.kaybeebio.com), announced the launch of their upcoming product, “FUNGO RAZE”.

FUNGO RAZE is a patented, ECOCERT, and ISO certified broad spectrum botanical-based bio-fungicide.

National Research Institutes and Agriculture Universities tested.

As the continued debate on the importance of organic farming, organic foods, and other ecologically sustainable products proceeds, it was important to find an alternative form of Pesticides to grow crops without harmful chemicals.

FUNGO RAZE being an [environment friendly bio-fungicide](#), is highly suitable for organic farming and recommended for chemical residue-free export production.

In comparison to synthetic chemicals and other bio-fungicides available in the market,

[FUNGO RAZE](#) is the best quality bio-fungicide derived from botanical extracts, enriched with multiple marker compounds.

With multiple modes of (Systemic) action, it acts as anti-sporulation and breaks down the fungal cell wall to kill the pathogen, and it shows effective results within 48 hrs.

[FUNGO RAZE](#) is highly effective against a wide range of plant pathogenic fungi groups (Oomycetes, Basidiomycetes, Ascomycetes, Deuteromycetes)

including important diseases viz., downy mildew, powdery mildew, early blight, late blights, anthracnose, rusts, etc. on Grape, Potato, Chilli, Tomato, Okra, Cucumber, landscaping crops, hydroponics Plants, Indoor Plants, Lawn, etc.

About the Company

Kay-Bee Bio-Organics Pvt. Ltd. India's first-ever manufacturer of botanical based Bio-pesticides is a subsidiary company of Kay-Bee Exports which is Leading exporters of residue-free & organic products.

Key products are Pomegranates, Mangoes, Fresh-Cut fruits, Okra, Gourds, Chilies, etc. It handles more than 5000 tons of produce per annum with customers in Europe, North America, Middle East, South East Asia, and Oceania.

We, Kay-Bee Bio-Organics are committed to the manufacturing and supply of agricultural Inputs, especially for Organic and Sustainable farming.

As exporters, we are working with the farmers in the form of contract farming for the last 15 years and we know farmer's difficulties with cost-effective feasible organic, and residue-free farming.
