

## Geyser Systems Receives Colorado Lending Source's Small Business Excellence Award

Cutting edge water-optimizing startup successfully navigates 2020 with sell-through, an expanded operations team and growing relationships with Colorado Lending Source, Region 9 and Alpine Bank.

**Colorado, Montrose, Jan 29, 2021 ([IssueWire.com](http://IssueWire.com))** - Geyser Systems was announced as a recipient of Colorado Lending Source's Small Business Excellence Award.

"We learned about Colorado Lending Source while at Gunnison's Catapult accelerator. At that time, we were still operating in Texas. Simply put, there is nothing like this for small businesses in Texas. Colorado Lending Source was one of the key reasons why we moved our headquarters and manufacturing from Texas," says Jonathan Ballesteros, founder, and CEO of Geyser Technologies. "We're honored to be recognized by such a talented and high caliber team. We wouldn't be here without their Main Street loan program."

This milestone represents a triumph over many unforeseen obstacles over the course of 2020. Even in the wake of the COVID-19 pandemic, Geyser Systems successfully expanded its workforce and is growing in Australia through its distributor across the pond, Peak Off-Road Equipment. Geyser Systems is now working with Alpine Bank and Region 9 for continued growth in all REI Co-op stores. They aim to launch in Europe in the middle of this year.

Geyser Technologies (DBA Geyser Systems) designs and manufactures products that make the most of every drop of water. Their flagship product, Geyser System, is a hot portable shower that uses less than one gallon of water. They currently serve the outdoor gear industry and aim to serve the military, natural disaster relief, home healthcare, and outdoor gear industries.
