

Hip-Hop Artist, 4gmusiq, Has Now Amassed 50,000 Streams on “Spring Break”

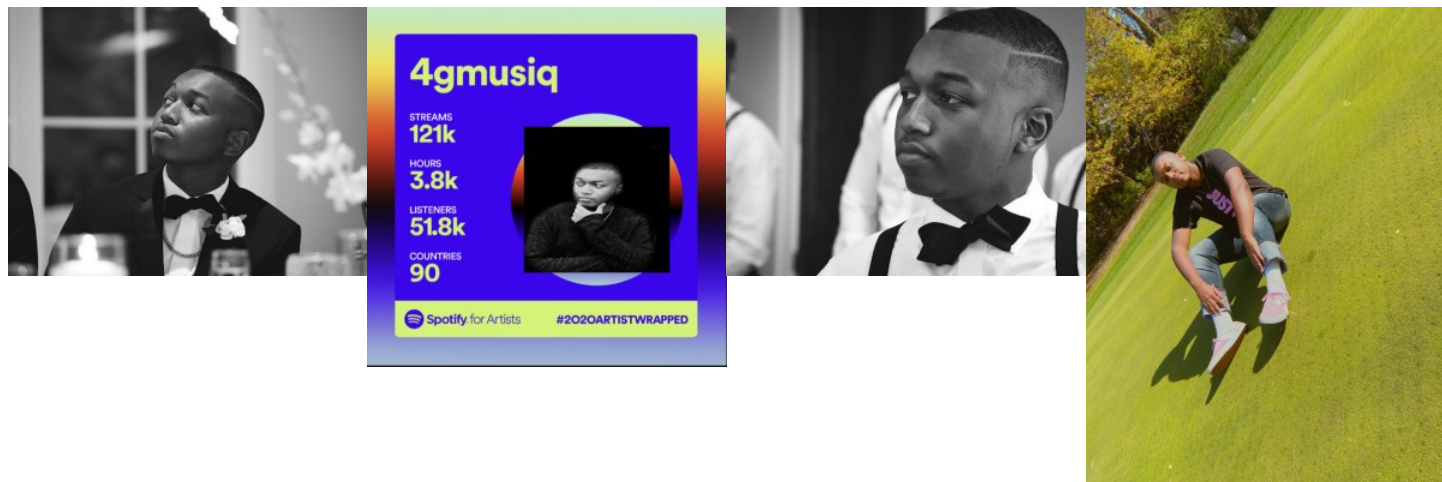

California, Los Angeles, Jan 22, 2021 (Issuewire.com) - “Spring Break” was released in the summer season mid-July, and in less than a year with very little promotion has amassed 50,000 total streams worldwide. With numbers like that I, it has become 4gmusiq’s most-streamed track passing the previous #1, No Chorus.

With Springtime right around the corner, we anticipate the song to keep growing each year around this time. The song goes bar for bar opening with a witty verse and bridge. The song ends with a catchy chorus and makes hip-hop fans want to go ahead and hit replay.
