

How to run Hummingbot in the cloud?

Learn how to run Hummingbot on Cloud with IndSoft Systems Cloud.

The screenshot displays the IndSoft Systems Cloud interface. On the left is a dark blue sidebar with navigation icons. The main content area is titled 'Choose Billing Cycle' and features two buttons: 'Monthly \$25.00 USD' (black) and 'Annually \$275.00 USD' (yellow). Below this is a 'Configurable Options' section with dropdown menus for 'Operating System' (set to 'Snapshot') and 'Application'. A yellow banner at the bottom of this section reads: 'Have questions? Contact our sales team for assistance. Click here'. On the right, an 'ORDER SUMMARY' box lists the items: 'HummingBot Cloud - eCloud' (\$25.00 USD), 'HummingBot Cloud' (\$25.00 USD), 'Operating System: Snapshot' (\$0.00 USD), and 'Application' (\$0.00 USD). It also shows 'Setup Fees: \$0.00 USD', 'Monthly: \$25.00 USD', and a 'Total Due Today' of '\$25.00 USD'. A 'Continue' button is at the bottom right.

Mumbai, Jan 2, 2021 ([IssueWire.com](https://www.issuewire.com)) - HummingBot has revolutionized the way trading bots were deployed at a professional scale. Ease of use and Host of value-added features added to the platform gives hummingbot an incredible edge over its competitors. For the users to make optimum use of the HummingBot platform, requires a well-configured server and stable internet connection.

Three factors that currently limit users potential to gain fabulous results on hummingBot are:

- Lack of computing power
- Stable connectivity
- Expertise in setup and deployment of Hummingbot

IndSoft System now offers an excellent opportunity for all users who are looking at the deployment of HummingBot on a professional scale. We offer a pre-installed, preconfigured hummingbot cloud.
