

IFO covers the world, bringing hope for a brighter 2021

Swarms of UVify IFO spotted in skies around the world

San Francisco, Jan 19, 2021 ([Issuewire.com](https://www.issuewire.com)) - UVify's IFO swarm light show drones were spotted flying in the skies in the four corners of the world, dazzling spectators and bringing hope for a brighter year ahead.

In the UK, Celestial Labs performed an amazing multi-day event with a fleet of 150 IFO at Hogmanay moved the people of Scotland with a heartfelt message of hope, while saying goodbye to the year behind us and to those who departed from this mortal coil. In Germany, Zouber put on a stunning 100 IFO show for the people of Pforzheim. In Mexico, Pyromar performed a show in Mexico City, while Pirotecnia / Skylab put on another amazing performance in Mexico as well. In Korea, UVify put on a show with superstar boyband BTS which featured 1,000 IFO flying in perfect precision and is the world's most-viewed drone light show on YouTube with three million views and rising as of the date of this press release.

Going forward, these key creative partner companies will continue to wow the people of the world by delivering best-in-class creativity, capabilities, and innovation with UVify IFO swarm light show drones. UVify is the leader in swarm light show drones and ships more drones than any other company in the world. The IFO is the world's most precise swarm light show drone and can be seen in the most prestigious events
