Dentistry, also known as Dental and Oral Medicine, is a branch of medicine that consists of the study, diagnosis, prevention, and treatment of diseases, disorders, and conditions of the oral cavity. Dentists diagnose and treat dental issues and help patients develop better oral hygiene regimens. They clean teeth, correct bite issues, perform surgeries and extractions and perform other duties to ensure that the teeth and mouth are healthy.

On a more personal note, Dr. Rupenthal is married to Kathy, the warm and welcoming face patients first see at the practice's front desk when they come in for their dental appointments. The couple is the proud parents of three sons.

Along with community-based involvement, Dr. Rupenthal is often geared-up for the great outdoors, be it a day of hiking, a weekend camping trip, or taking exciting adventure-seeking vacations. When he is not aiming for an adrenaline rush, one will likely find him tending to his garden or restoring his '56 MGA.
