

## **Message from the future: We made it, is a visionary book describing a potentially positive future**

This book is an attempt to describe the future how it might become if we take the right decisions today.

A VISION OF A BLOSSOMING  
NEW HUMAN CIVILIZATION

Henning Jon Grini

**Hordaland, Bergen, Jan 21, 2021 (IssueWire.com)** - Joe Biden is now president and most of us are feeling relief and that better time lies ahead. And that's why GaiaInnovations are releasing the next book at exactly this time. The book is called **Message from the future - We made it.**

The book is a vision of humanity living around half a century into the future. The main message is that mankind made the transition to a more loving, brighter, and enlightened future. In this book, the reader gets to experience what life is like in this future society where mankind has managed to overcome most of its problems.

The book presents numerous conversations about the difference between their society and how they managed the transition. This is also set in a future where contact with our cosmic friend is beginning to be normal.

With so many humans going through so much hardship and problems these days we need a vision of a better future and that is exactly what this book is all about.

Title: [Message from the future: WE MADE IT!](#)
