18th January 2021, Mumbai: (newtum.com/) If you are interested in learning a programming language but just can't find the right platform for it, then Newtum can be your learning partner. With its rich collection of popular programming language courses and an amazing team of faculty available, Newtum can offer the best possible learning experience.

Newtum currently offers [python certification course online](#), C++, turbo C, C, blockchain, etc. The online learning platform is continuously widening its scope of the curriculum and adding more popular courses to its collection. Be it for your career or your personal interest, learning a programming language can give you an advantage over others. Programming languages are nothing but the language of our machines.

The machines we use every day like our laptops, smartphones, PCs, all use applications and software that are written using different types of programming languages. When you have a good understanding of a particular language, you can understand for yourself how the application works and how it can be customized. If you have ever played around a bit on your smartphone, you must have come across a setting known as 'developer tools'. This setting might confuse you at first if you do not have an

understanding of programming languages. It is all about how your device works or how your applications are created. When you have a good idea of programming, you yourself can make some cool customizations and even create your own application.

Programming languages essentially enable the learner to create their own software and platforms. They are the building blocks upon which the whole system is made. Just like Lego. The more you play with it, the more you learn about it. It might seem complex at first, but if you spend some time learning about it, you would know that it is not all that bad.

Programming languages have their own charm. And a good thing about programming languages is that you do not need to travel to a particular academy to learn them. You can [learn python online](#). Simply sitting at your own home with a good enough PC, you are completely capable of learning a programming language.

So what are you waiting for? Gear up with the online courses offered by Newtum and venture into the wilderness of the computing world. Explore the new opportunities that are in front of you and see what charms you the most.
