

Punitha Jayaramaraju, MD, a Pediatrician with Rani Pediatrics

Get to know Pediatrician Dr. Punitha Jayaramaraju, who serves patients in Corpus Christi, Texas.

New York City, Jan 15, 2021 ([Issuewire.com](https://www.issuewire.com)) - Dr. Jayaramaraju, also known as “Dr. Jay”, is a caring pediatrician working alongside Dr. Sabeen Rani, MD, at Rani Pediatrics in Corpus Christi, Texas. She brings a top-rated academic background and the successful completion of two different residency programs that will further strengthen newborn care at the practice.

With its exciting zoo-themed décor, Rani Pediatrics is the best place in town for comprehensive children's care. The providers are ready to provide children with checkups, vaccinations, sick visits, and more. They have even set aside a special nursery just for newborns and their parents.

After ranking in the top 99.99% for the post-graduate entrance exams, Dr. Jay entered and completed a residency in obstetrics and gynecology at Stanley Medical College in Chennai, India. Upon graduation, she became an assistant OB-GYN at Joseph's Hospital.

After her son was born, and in coordination with her husband's own medical career, her family moved to Florida. Rather than seek a U.S. residency program in obstetrics and gynecology, Dr. Jay decided to complete an additional residency program in pediatrics at the University of Florida. She continued with the University as an Assistant Professor for General Pediatrics. Her family moved to Corpus Christi in 2018 to make the coastal bend their permanent home.

Specializing in the health care of children, the doctor is board-certified in pediatrics by the American Board of Pediatrics (ABP). The mission of the ABP is to advance child health by certifying pediatricians who meet standards of excellence and are committed to continuous learning and improvement.

Pediatrics is the branch of medicine that involves the medical care of infants, children, and adolescents. The American Academy of Pediatrics recommends people be under pediatric care up to the age of 21. Pediatricians provide medical care to people ranging in age from newborns to young adults. They are trained to examine, diagnose, and treat children with a wide variety of injuries and illnesses through all of their developmental stages, as they grow and mature.

On a more personal note, Dr. Jay has a husband who works in Driscoll Children's Hospital's Pediatric Intensive Care, and a son who loves to come to the clinic to play with Darla and Jolene, the on-site comfort puppies.
