

Schaf Skincare launched A Body Lotion

SCHAF makes simple and clean skincare products that are effective for all ages, genders and skin types.

Toronto, Jan 8, 2021 ([Issuewire.com](https://www.issuewire.com)) - Its founder, Peter Schafrick, was concerned with all the irritants in skin care products, and so decided to manufacture his own product line. “I’ve been obsessed with looking for effective, natural skin care products for a number of years,” said Schafrick. “I complained to friends and family, only to be challenged to create my own products. So I did.”

Schafrick believes simplicity and minimalism is the essence of wellbeing, and his Less-Is-Best philosophy was his motivation to create simple, effective, clean skincare products that don't discriminate - they work for all genders, ages, and skin types, helping people solve real skin issues, and delivering healthy-looking skin.

“We combined the best of science and nature to create a skincare line that delivers real results. Our products contain a natural blend of plant extracts formulated to clean, nurture, and protect your skin, plus potent amounts of time-tested, science-backed ingredients. And today we are launching our new Body Lotion, because the rest of your body deserves the same TLC as your face” says Schafrick.

Schaf Body Lotion. 150mL CAN\$30. Formulated to deliver both immediate and long-term benefits to your skin. Non-irritating. Non-sensitizing.
