

Speedy Saim in Magical Methods Hall of Fame

Listen to his dad... How he worked with Saim for this...

United Kingdom, London, Jan 20, 2021 ([Issuewire.com](https://www.issuewire.com)) - Arithmophobia (Fear of Math) is a global phenomenon. Research shows that more than 85 % of students fear mathematics. They fear mathematics because everybody around them tells that MATH is difficult. People around them narrate their stories about how they used to bunk mathematics classes and score pass marks in the subject. They even go to the point of telling that even today they are very poor with mathematics. The environment around them makes it more difficult and the student develops a mindset that MATH is difficult. [Magical Methods](#) is doing an honest effort to change the mindset that MATH is difficult.

Magical Methods Hall of Fame is a place where **Magical Methods** admit those students who score more than 1 on [MQ](#) (Mathematical Quotient) test.

Magical Methods is very proud to announce the entry of **Speedy Saim** in [Hall of Fame](#). He is in Year 3 in British School System. His First [MQ test](#) was taken on 25th Sept 2020. At that time his MQ Score was 0.46. The last [MQ test](#) was taken on 10th January 2021 and his MQ Score is 1.47.

Mr. Shirish Sahay interviewed Speedy Saim's father **Mr. Ash Mahmud** to understand the phenomenal change. Please view the accompanying video to learn more.
