

Tamir Friedman, MD, a Radiologist with Advanced Vein & Aesthetics

Get to know Radiologist Dr. Tamir Friedman, who serves patients in Torrington, Connecticut.

New York City, Jan 13, 2021 ([Issuewire.com](https://www.issuewire.com)) - Being a dual board-certified radiologist, Dr Friedman's special clinical interests include interventional oncology, vein therapies, and minimally invasive procedures. He works at Advanced Vein & Aesthetics in Torrington, Connecticut.

The facility has been providing cutting-edge services to the surrounding community for 20 years. It has been performing minimally invasive vein procedures including varicose and spider veins of all severities and takes pride in outstanding results and high patient satisfaction.

The mission of Advanced Vein & Aesthetics is to provide the highest quality, compassionate, advanced vein care and medical aesthetics for the communities it serves in New England.

Born in Israel, Dr Friedman moved to South Africa at the age of six. He later moved to the United States and grew up in Cheshire. He was always fascinated by science and medicine and knew he wanted to become a doctor from a young age. He sought out mentors and did research at Yale-New Haven Hospital with doctors during the summers while earning his bachelor's degree.

Following an exciting medical career, he graduated with his medical degree from the Drexel University College of Medicine. He did his residency in radiology and his fellowship in interventional radiology at Yale-New Haven Hospital. He was then an Assistant Professor at Weill-Cornell University College of Medicine specializing in deep and superficial venous disease, oncology, and women's interventions.

With the help of a fluoroscopy machine and years of specialized training following medical school, Dr Friedman uses image-guided techniques to treat some kinds of cancer, alleviate the pain and symptoms of uterine fibroids, and fix vascular diseases such as varicose veins and blocked arteries.

"There's no better gratification than interventional radiology, which allows me the privilege to tremendously help patients, day in and day out. You do these minimally invasive procedures, which are quick by most standards, and patients really see instant results – especially in pelvic pain, veins and also in treating cancer" expressed the doctor.

Relating to his profession, he serves as the Chairman of Radiology at Charlotte Hungerford Hospital. He also remains affiliated with the Department of Radiology at Greenwich Hospital & Advanced Medical Imaging of Northwest Connecticut.

Thriving in his field, Dr Friedman is board-certified in diagnostic radiology and interventional radiology by the American Board of Radiology (ABR). The ABR is a not-for-profit physician-led organization that oversees the certification and ongoing professional development of specialists in diagnostic radiology, interventional radiology, radiation oncology, and medical physics.

Radiology is a medical speciality that uses medical imaging to diagnose and treat diseases within the human body. Radiologists are medical doctors who specialize in diagnosing and treating injuries and diseases using medical imaging procedures, such as exams and tests, X-rays, computed tomography, magnetic resonance imaging, nuclear medicine, mammography, positron emission tomography, and ultrasound.
