

Tom XL Tan, MD, FACR, a Radiologist with Radiology & Imaging of South Texas

Get to know Radiologist Dr. Tom XL Tan, who serves patients in Corpus Christi, Texas.

New York City, Jan 15, 2021 ([IssueWire.com](http://www.IssueWire.com)) - With an eye for detail and good observational skills, Dr. Tan is a highly trained radiologist at Radiology & Imaging of South Texas, LLP. It comprises Alameda Imaging Center and South Imaging Center in Corpus Christi, Texas.

The team of physicians at Radiology & Imaging, each a Diplomate of the American Board of Radiology, have offered patients and referring physicians expertise in many areas of radiology. They provide diagnostic imaging services in a caring, comforting patient environment with leading-edge imaging technologies. Their extensive expertise in medical imaging allows them to give physicians and patients the very best in service and care.

Upon graduating with his medical degree from Xi'an Medical University in China in 1985, Dr. Tan went on to further his training in the United States. He completed his residency in nuclear medicine at The Christ Hospital in 1996, and his residency in radiology at The Ohio State University Wexner Medical Center in 1999.

An authority in his field, the doctor is board-certified in diagnostic radiology by the American Board of Radiology (ABR). The ABR is a not-for-profit physician-led organization that oversees the certification and ongoing professional development of specialists in diagnostic radiology, interventional radiology, radiation oncology, and medical physics.

Furthermore, he holds board certification through the American Board of Nuclear Medicine, which is the primary certifying organization for nuclear medicine in the United States. It certifies physicians as specialists in the practice of nuclear medicine.

In addition to being a Fellow of the American College of Radiology (FACR), Dr. Tan is a member of the Radiological Society of North America and the American Medical Association.

Radiology is a medical specialty that uses medical imaging to diagnose and treat diseases within the human body. Radiologists are medical doctors who specialize in diagnosing and treating injuries and diseases using medical imaging procedures, such as exams and tests, X-rays, computed tomography, magnetic resonance imaging, nuclear medicine, mammography, positron emission tomography, and ultrasound.
