

wuchna - Business Transaction Network

New Delhi, Jan 13, 2021 ([IssueWire.com](https://www.issuewire.com)) - Wuchna is a Business Transaction Network and Technology Enabler for small and medium enterprises around the globe. Businesses register themselves on Wuchna.com to reach out to potential clients and adopt Wuchna's enterprise solutions like mobile-app enabled websites and software to seamlessly interact and transact with clients. Wuchna's mission is to provide every small business with the tools they need to stay competitive. Wuchna has over 1 million listings spread across 17 countries, each with a country-specific subdomain catering to local businesses.

Businesses such as clinics, salons, spas, astrologers, movers and packers, consultants, etc. create their profile by providing basic details like the name of the business, contact details, address, and a few other details. Once the profile is saved, our team at Wuchna reviews the details and publishes the profile. The creation and maintenance of profiles at Wuchna are free of cost. Businesses also need not pay any commission if they receive potential customers via Wuchna directly. Customers visiting Wuchna can search for services based on their requirements.

We are excited to launch Wuchna to help small businesses across India. It is very essential to have an online presence in this era and not every business can afford to maintain its own website and hence we at [Wuchna](https://www.wuchna.com) provides a platform where small and medium businesses can connect to customers directly, and take our services to upgrade their web presence via websites that utilize the latest mobile application technologies.
