

Alejandro Castaño, DDS, a Periodontist with Castaño Periodontics & Dental Implants

Get to know Periodontist Dr. Alejandro Castaño, who serves patients in Denville, New Jersey.

New York, New York City, Feb 18, 2021 ([Issuewire.com](https://www.issuewire.com)) - Dr. Castaño, an experienced periodontist, is the owner and operator of Castaño Periodontics & Dental Implants in Denville, New Jersey. He focuses on the needs of each patient to provide a comfortable patient experience in a relaxing and modern environment.

At his dental practice, some of the services that he offers include dental implants, tooth extraction and site preservation, soft tissue (gum) grafting, crown lengthening, periodontal surgery, peri-implantitis treatment, oral biopsy, ridge augmentation, and sinus lifts.

Originally from Colombia, South America, Dr. Castaño immigrated to the United States with his mother and father in 1995. He began his secondary education at the University of Miami under the Trustee's Merit Scholarship and earned a Bachelor of Science degree in Biology in 2010. He then entered the prestigious College of Dental Medicine at Columbia University in New York City on the Dr. Marlene Klyvert Merit Scholarship, earning his Doctor of Dental Surgery degree in 2014. After completing his doctorate, he was accepted into residency at New York University College of Dentistry and earned his specialty certificate in Periodontics and Implant Dentistry in 2017.

Board-certified in Periodontology and Dental Implant Surgery through the American Board of Periodontology, he is a member of the New Jersey Dental Association, the American Dental Association, and the Tri-County Dental Society. He attributes his success to his attention to detail and the support of his father, a medical doctor himself.

Having engaged in clinical research, Dr. Castaño has published works in major scientific dental journals regarding the novel treatment of oral melanoma, periodontal plastic surgery in areas of prominent roots, posterior immediate dental implants, and simultaneous hard and soft-tissue augmentation in the esthetic zone. Recently, he has lectured on and is awaiting the publication of his works on the implementation of additive manufacturing (3D printing) in dental bone grafting procedures.

Periodontics is the dental specialty focusing exclusively on the inflammatory disease that destroys the gums and other supporting structures around the teeth. A periodontist is a dentist who specializes in the prevention, diagnosis, and treatment of periodontal, or disease, and in the placement of dental implants.

Outside of practicing periodontics, Dr. Castaño's hobbies include photography, basketball, cycling, motorsports, and traveling. He is fluent in two languages (English and Spanish) and has a passion for college football.
