WSPOS Global Grand Rounds #4

New South Wales, Sydney, Feb 19, 2021 (Issuewire.com) - The World Society of Paediatric Ophthalmology and Strabismus (WSPOS)'s fourth edition of the Global Grand Rounds promises to be another exciting and informative one.

"This weekend is not only going to be busy but jam-packed full of learning and teaching - thanks to back

to back WSPOS live webinars,” [Dr Parth Shah](#) told the media.

Scheduled on the coming weekend, i.e. February 19, February 20, and February 21, 2021, the global live webinar series is bound to be useful for all participants. The three-day event involves many experienced ophthalmologists, and an audience from around the world will include ophthalmologists, ophthalmology trainees, orthoptists, optometrists and other eye health professionals.

On the first day, February 19, 2021, there is an all-day session geared toward ophthalmology trainees. At this unique ‘Paediatric Ophthalmology in a Day’, Dr Shah is going to inspire young minds and enlighten them on paediatric glaucoma. Talking about the event session, Dr Shah thanked the WSPOS team and Mr John Ferris (one of Dr Shah’s mentors) for the invitation.

The next day, Dr Shah will return for a case presentation as part of Global Grand Rounds #4 on Saturday, February 20, 2021. The session will start at 2 PM GMT. Dr Parth Shah will be presenting an interesting case of congenital corneal opacity and glaucoma. He is joined on the panel by expert ophthalmologists from around the globe. Dr Shah is also excited about Dr Guirao Navarro’s presentation on sudden onset esotropia in an infant.

While talking to the media, Dr Shah said, “The discussion will surely be stimulating! So I am really looking forward to it.”

The educational event will be concluded on Sunday, February 21, 2021, which is dedicated to strabismologists from around the world. The Strabismus Hall of Fame will be held on this day, where all the experts in the panel will share their priceless insights.

The World Society of Paediatric Ophthalmology and Strabismus (WSPOS) is an international organisation established in 2008. Its collegial ethos allows the Society to openly discuss and debate important and controversial matters in the field of [Paediatric Ophthalmologist](#) and Strabismus. For more, information, visit <https://www.wspos.org>.

This is the second season and 10th episode of the WSPOS World Wide Webinar. These webinars are an amazing forum for paediatric ophthalmologists and strabismologists from around the world to discuss and learn from one another. This is everything from surgical techniques, new trends and innovations, and educating trainees in the field of Paediatric Ophthalmology and Strabismus. The forum was started nine months ago and the first live webinar was held on April 29, 2020. Dr Shah is honoured to be an active member of WSPOS, a member of the WSPOS Connectivity Bureau, and invited to speak regularly at the World Wide Webinars. Season 2, WWW 10: WSPOS Global Grand Rounds #4
Saturday, 20th February, 2021 - 14:00 GMT (7:30 pm IST, 9:00 am USA, ET*)

WSPOS Strabismus Hall of Fame Webinar
Sunday, 21st February, 2021 - 14:00 GMT (7:30 pm IST, 9:00 am USA, ET*)

WSPOS is holding a unique 'Strabismus Hall of Fame' webinar on Sunday, 21st February, 2021. We need you, our members to join all our past WSPOS Strabismus Keynote speakers in a Round-Table platform. Please send us your questions in a 30-second video clip. The WSPOS Executive Bureau will choose the best questions to air live for discussion. The esteemed panel will get ALL your questions and will respond by way of a written document that will be uploaded onto our WSPOS website. Please direct your simple & / complex Strabismus questions to one or more of our esteemed panelists (Dr. Burton Kushner, Emilio Campos, Kenneth Wright, Lionel Kermal & Richard Hertz). While this is a great portal for you to interact with these stalwarts, please remember that isn't the time to ask about a specific patient's case, but rather to speak to them about approaches, concepts, history, innovation, etc. Your questions could be either surgery or concept-related & could also include re-operations, ocular motility & myotropism. Please email your question clips to admin@wspos.org with the Subject line "WSPOS Strabismus Hall of Fame Webinar - Question to Panel" or parth@drparthshah.com to send us your video clips. Please make sure you send your video clips on or before 17:00 GMT on Friday, 19th of February, 2021.
