Organized by

Biziverse Pvt. Ltd., a startup launched by two US-returned founders based in Gandhinagar (Gujarat), has organized a mega online tradeshow “ElectroB2B”, during 25-27 February, to serve the growing needs of the Indian Electronics industry.

Electronics is one of the most vital segments where “Make in India” is trying to gain momentum. However, it is difficult for manufacturers to find sources of Machinery, Components, Printed Circuit Boards, and Services from across India. Biziverse has innovated a powerful B2B marketplace to facilitate such sourcing, with an initial emphasis on the electronics sector.

ElectroB2B, the online expo organized by Biziverse, offers a convenient platform for electronics manufacturers to find suppliers from their laptops or mobiles and connecting via easy channels such as Google Meet (video), WhatsApp (text), or on phone.

Visitors to ElectroB2B can view structured e-Halls for Machinery, Components, PCBs, and Services for Design and Assembly. They can visit e-Stalls of exhibitors and thereafter inquire about their offered products or services. Visitors also have the unique option to post their inquiries to the entire segment hall and collect and compare offers, which is unique to ElectroB2B.

The 200+ exhibitors on the expo get several facilities that are beyond the scope of traditional expos, such as anywhere access even from home, along with a powerful CRM tool to manage inquiries, quickly respond with quotations, and thereafter follow up with the leads generated at the expo.

ElectroB2B addresses the key concern of electronics manufacturers to find strong sources while empowering Indian vendors to promote their machinery, products, and services, even when the coronavirus led to the cancellation of almost all traditional tradeshows during the past several months. ElectroB2B aims to thus directly serve the electronics industry and contribute to the cause of Make in India.

About Biziverse

Biziverse Pvt. Ltd. is a startup venture promoted by two US-returned siblings Ekta Shah and Parth Shah, with the mission to simplify the Business-to-Business (B2B) environment and standardize B2B transactions. While Business-to-Consumer (B2C) services are now well-organized with platforms such as Amazon, Swiggy, Uber, the B2B interactions like Inquiries, Order status, Delivery updates, Payment recovery, Feedback is unorganized and lead to anxiety. Simplified and Standardized B2B can empower entrepreneurs and significantly increase the ease of doing business. Biziverse is free for use and generates revenue from virtual tradeshows and low-cost mobile business tools such as CRM and ERP.
