The primary existence of mental disorders is frustration and negative thinking. According to Dr. Kailash, there are cases where there is a lack of family support, the symptoms of the victim are due to a certain behavior of his parents that just needs support. Solving the problems with the victim and the family as a whole should be the actual approach for the treatment instead of dosing the brain with the medicines as other psychiatrists are doing without needing to find the root cause and then treat it.

He believes that running away from the treatment and just using medicines to cure the disorders is just like throwing the victim in a deeper level of the diseases making the treatment even more difficult.

There are so many factors and causes for mental illness but the main factor according to Dr. Kailash is frustration, which comes from expectation, fear and anger. Frustration is the root causes of the development of these mental disorders. The treatment at home is not as successful as the patient is usually stressed with the home environment or strict behavior of their parents.

A psychiatrist that just gives a list of medicines instead of a closer relationship with the patient that what makes Dr. Kailash different, successful and revolutionary.

Dr. Kailash treats the patient with his developed therapies for which he just needs long sessions in which the victim required to participate.
